Environmental Consulting & Grant Writing

CAPABILITIES STATEMENT

About NIXE:

NIXE was founded in 2022 to provide expertise for environmental projects in North Idaho and beyond. Services such as grant writing and communications also benefit clients in other fields. Kajsa Van de Riet is the owner and Principal Consultant with more than 20 years of experience including water quality management for the State of Idaho, national fisheries research initiatives at the Montana Water Center, and managing conservation programs for national and regional nonprofits. For more information about NIXE, visit <https://nixeenvironmental.com>.

Specialties and Core Competencies

- Stream and river restoration project planning and implementation
- Monitoring and assessment for fish and wildlife, habitats, and water quality
- Aquatic resources assessment and management
- Environmental review, permitting, and regulatory compliance
- Data management, analysis, quality assurance and reporting
- Aquatic organism passage assessment and improvement
- Facilitation and communications (e.g., community outreach, media relations)
- Grant writing

What Sets NIXE Apart?

- Fisheries technical expertise including an M.S. in Fishery Resources
- Ten-year member of the intergovernmental technical team that developed a comprehensive basin-scale watershed restoration plan and implementation program incorporating NRDA, CERCLA, and NEPA associated with ecological injuries from metals.
- Seventeen years managing and implementing on-the-ground projects to improve fish habitats and water quality.
- Extensive work with groups including 15 years facilitating a watershed stakeholders group.
- Successful record collaboratively securing \$6.2 million in grant funds for diverse projects.

NIXE Performance History
