## CAPABILITIES STATEMENT

NIXE Environmental was founded in 2022 to provide expertise for environmental projects in the Pacific Northwest and beyond. Services such as grant writing and communications benefit a range of clients. Kajsa Van de Riet is the owner and Principal Consultant with more than 20 years of experience, including water quality management for the State of Idaho, national fisheries research initiatives at the Montana Water Center, and managing conservation programs for national and regional nonprofits.

## Specialties and Core Competencies

- Stream and river restoration project planning and implementation
- Monitoring and assessment for fish and wildlife, habitats, and water quality
- Environmental review, permitting, and regulatory compliance
- Data management, analysis, quality assurance, and reporting
- Aquatic organism passage assessment and improvement
- Facilitation and communications (e.g., community outreach, media relations)
- Grant writing

## What Sets NIXE Environmental Apart?

- Extensive fisheries technical expertise, including a Master of Science in Fishery Resources.
- Proven success in collaboratively securing over \$6.2 million in grant funding.
- Ten years as a member of an intergovernmental technical team that developed a comprehensive watershed restoration plan and implementation program, incorporating NRDA, CERCLA, and NEPA processes for recovery from metals-related ecological injuries.
- Seventeen years of experience managing and implementing on-the-ground projects focused on improving fish habitats and water quality.
- Fifteen years facilitating a watershed stakeholders group and wide-ranging work with groups.
