

THE CAUSE OF DRY EYES

Tears are made up of three parts: oil, water, and mucus; each component is made from different parts of the eye. The primary cause of Dry Eyes is a deficiency of one of the tear-producing glands.

The most common cause of Dry Eyes is Meibomian Gland Dysfunction (MGD). There are about 30 Meibomian glands in the upper eyelid,

and around 25 in the lower. Their function is to secrete oils onto the surface of the eye, keeping tears from evaporating too quickly. MGD is a blockage or some other abnormality of the glands so that they don't secrete enough oil into the tears. This causes the tears to evaporate more rapidly leading to dry eye and blepharitis.

If left untreated, severe dry eyes may lead to eye inflammation, abrasion of the corneal surface, corneal ulcer and vision problems. The cornea is like the clear front window of the eye that transmits light to the interior of the eye and allows us to see clearly. Dry Eye is a serious condition that can affect the cornea that can cause clouding, vision distortion and eventual blindness

Regener-Eyes® is a natural, non-surgical, and long-lasting solution for dry eyes.

What is Regener-Eyes?

The Regener-Eyes® treatment is a natural biologic developed as a moisturizing agent.

The science of regenerative medicine focuses on stimulating the body's own natural ability to heal and regenerate.

Regener-Eyes® is a sterile, acellular biologic made from 771 **anti-inflammatory cytokines, and growth factors**. These proteins are necessary for cell function, overall health, and homeostasis.

The Three Steps to Healing:

Remove the Inflammation

The anti-inflammatory cytokines communicate to your body and cells to reduce/remove your inflammation, beginning the healing process

Reduce your Pain and Discomfort

As the inflammation reduces, your pain and discomfort will decrease, helping the body to return to homeostasis.

Healing and Regeneration

The growth factors are used as a fuel source to stimulate the body's natural ability to heal and repair.

How it Works:

Regener-Eyes is sterile, acellular, and is made from placental derived biomaterials. These biomaterials consist of nutrients such as proteins, cytokines, and growth factors.

These nutrients stimulate the body's own natural ability to heal and regenerate.

Cytokines help reduce inflammation

Growth factors aid in healing and regeneration

Hyaluronic acid helps to lubricate and protect the eye.

It is non-steroidal and non-addictive. Its sterile and is prepared using a patented process to ensure the safety, bioactivity, sterility, and preservation of the product.

Use 1 drop twice a day for the first 2-4 weeks, then cut down to once a day for the remainder of treatment.

People typically see results in 1-3 months.

A one-month supply of Regener-Eyes is \$195, and is available in office without a prescription.

With a 3 month supply we offer a 10% discount, saving you \$20 a bottle!

REGENER-EYES MUST BE REFRIGERATED AT ALL TIMES!

The Regener-Eyes® Advantage

- Sterile and acellular
- Non-steroidal
- Non-addictive
- No reported adverse events
- Long term solution
