The Reality We See In Our Mind's Eye...

... Here & Now

*If you resonate with the views shared below,

There are moments when ancient questions reappear in the modern world – quietly, but persistently. A scientific inquiry into whether a *yajna* – a sacred Vedic fire ritual – can bring rain might, at first glance, seem like a quaint curiosity from a cultural past. Yet beneath this question lies something far more significant: an ongoing debate between two paradigms/worldviews. To ask whether a ritual can influence the weather is not merely to question the efficacy of fire and smoke. It is to confront the very limits of material causality. The scientific lens, grounded in observable cause and effect, thrives on repetition and predictability. Whereas, rituals in ancient traditions are not mechanical formulas but conscious acts – rooted in the power of focused, deliberate intent. This is not poetic metaphor. This is causality of a subtler kind – triggered by harmony; when thought, word, and action are aligned with the rhythms of nature and the will of the cosmos.

In many belief systems of the world, including Indic philosophy, the universe is not dead matter. It is sentient and responsive to conscious intention and attention. To perform a *yajna* is not to manipulate natural forces, but to enter into alignment with them. Vedic seers were said to bring rain not through command, but through attunement. Their rituals were not spectacles, but participations in the cosmic order that binds all things in harmony.

Does this deserve examination? Yes. Everything deserves examination. To reject inquiry is to remain ignorant. But the question is not *whether* to investigate, but *how* to investigate. What kind of method can access this subtle dimension?

Modern science, for all its brilliance, often recoils from such notions – not because they are untrue, but because they defy its methodological scaffolding. This is a quiet tragedy. By narrowing the definition of knowledge to what is sense-bound, measurable, and replicable, vast inner domains of insight are cast aside as unscientific. But is science truly the pursuit of all knowledge – or only one kind?

This question points to a deeper need: not just for a new method, but for a broader epistemology. One that embraces multiple means of knowing.

We live in a time of profound disruption—ecological collapse, mental health crises, social fragmentation, and a deep sense of disconnection from nature and from ourselves. Many of the challenges we face today are not just technological or political, but epistemological—they reflect a narrowing of how we understand knowledge, meaning, and our place in the world. What is needed is a space where intuition, contemplation, and the refinement of subjective awareness are seen not as distractions from truth – but as instruments of it. Such a system

wouldn't discard rigour. It would redefine it. Knowledge, in this context, becomes not static information, but evolving wisdom.

Of course, such a shift requires courage. It calls for moving away from globally accepted norms and stepping into the less certain – but potentially richer – terrain of indigenous insight. It demands the humility to acknowledge that some answers lie beyond measurement. This is not a retreat into nostalgia. It is a movement toward epistemic plurality – a world where multiple ways of knowing coexist without hierarchy. Where ancient intuitions and modern instruments do not compete, but complement one another.

Our initiative (GI4QC Forum) emerges from the belief that Ancient Knowledge Systems, especially Indic Knowledge System, offer valuable, time-tested insights that are deeply relevant today. Far from being relics of the past, these systems present integrated ways of knowing that bring together reason, observation, intuition, and inner experience. They invite us to see the world not as a collection of isolated parts, but as a web of interdependence.

We believe, this is the moment to create space for genuine dialogue between scientific and spiritual worldviews—not to dilute either, but to explore how they might inform and challenge one another. In doing so, we hope to reclaim more holistic, humane, and sustainable ways of engaging with the world—ways that honour both the clarity of science and the depth of inner wisdom.

This Directory, by GI4QC Forum, is a humble attempt to bring together, under one umbrella, the various individual islands of excellence spread across the world (institutes and universities, informal groups, spiritual organizations, independent researchers, etc.) that are working in this direction. GI4QC Forum is a 'meta network' wherein we share our journeys/experiences, understand the progress made by each other, ask questions, clarify our doubts, gain a working knowledge of underlying concepts of each field, try to discern a pattern out of the disparate data points, and together attempt to bring that one change that we would like to see in this world – a paradigm shift towards a comprehensive spirituoscience framework.

In this directory you will find the details of many individuals who have been working with this vision – ranging from those who have just begun their journey to those who have spent tireless decades to bring to 'spotlight' the comprehensive spirituoscience domain of knowledge. Their contact details have been excluded from this compilation. You can reach out to query@gi4qc.org with specific requests and we will be glad to connect you to them.

We hope that this humble attempt of ours, to provide visibility and access to a vibrant and efficient community working towards a 'Paradigm Shift', will prove to be useful in your individual journeys too. You can contact us at info@gi4qc.org with suggestions and also with details of individuals working in this domain to help strengthen this Network of Networks.

Goutam Ghosh

City: Bengaluru, **State:** Karnataka, **Country:** India

Educational Qualification: M.Sc. (Physics), Post Graduate Diploma in Computer Application, Post Graduate Diploma in Yogic Studies.

Professional Background: Taught Physics for a few years and later joined the Planning and Development Department, Govt. of Bihar, Patna and looked after the IT operations for the department. After about 24 years of service, I took early retirement and followed my passion for Consciousness Studies as an Independent Researcher.

Area of Interest: My core area of interest is to develop a structured framework integrating consciousness, mind and matter based on Vedantic perspective that can address the reverse “Hard problem” of consciousness, i.e., emergence of materiality from consciousness. The second area where I have a deep interest is to explore how to stay relevant, as a conscious being, in the age of rapidly advancing AI systems that are encroaching upon the various aspects of human faculties.

Projects undertaken or in progress: Currently, I am involved in two writing projects. The first one is related to a four-layered Vedantic framework for solving the reverse “Hard problem” of consciousness, i.e., emergence of materiality from consciousness. The other project is related to an article that I am writing describing the need

for evolution of consciousness based on Vedantic perspective so as to cope with AI based systems that are being developed at an exponential rate ultimately leading to the transhumanism of the future.

Institutes and Organizations associated with: I worked in the Planning & Development Department, Govt. of Bihar, Patna for about 24 years and after taking voluntary retirement from service, doing independent research work in the area of Consciousness Studies.

Expectations from GI4QC Forum: My expectation from GI4QC Forum is to have interactions with members who are interested in the two areas that I have described in paragraph-7.

Projects of interest: Any project that aligns with my current area of interest outlined in paragraph-7

Other information: Some of the notable workshops/conferences that I attended and presented my views are as follows: -

In 2006, I presented my ideas at an international workshop on “Models of Brain and Mind” organized by the Saha Institute of Nuclear Physics, Kolkata. My presentation was related to the role of first person approaches to consciousness.

In 2007, I attended another workshop titled “Buddhist Philosophy and Modern Science”. It was organized by the Centre of Philosophy, National Institute of Advanced Studies (Bangalore), Sambasha (Kolkata) and Nav Nalanda Mahavira (Nalanda) at Nalanda, Bihar.

In 2008, I attended and presented my paper in the “World Congress on Psychology and Spirituality” organized by the Association for Transpersonal Psychology (USA), Infinity Foundation (Princeton, USA) & Shruti Foundation (Delhi) at New Delhi. My paper was related to the Mandukya Upanishad.

In 2020, I made a presentation at The Science of Consciousness Online Conference 2020 organized by the Centre for Consciousness Studies, The University of Arizona, Tucson, Arizona, USA. My paper was related to solving the reverse “Hard problem”, i.e., emergence of materiality from consciousness based on Vedantic philosophy.

In 2024, I presented my views on whether consciousness can emerge from artificial intelligence at a conference on “Machine, Mind and Consciousness” organized by the Bhaktivedanta Institute (Bengaluru) in the IISc campus, Bengaluru.

Some of the prominent online groups where I participated regularly are as follows: -

Starting in 2005, participated in discussions on consciousness across various online forums. One notable forum where I contributed articles regularly was JCS-Online. This forum was initially sponsored by the Journal of Consciousness Studies, UK. From December 2023 onwards, participating regularly in the online forum of Consciousness Studies Programme, National Institute of Advanced Studies, IISc Campus, Bengaluru.

Tanay Bansal

City: **Bengaluru**, State: **Karnataka**, Country: **India**

Educational Qualification: Integrated Bachelor's (Hons.) & Master's, Physics from IIT Kharagpur

Professional Background: Software Product Manager

Area of Interest: I believe that our thoughts and intentions influence the outside world in un-conventional ways of non-material modes (metaphysics, mind-matter interactions, real magic etc). Also, my hypothesis is that if anyone wants to observe "real magic or synchronicity between ones thoughts and events, or frequent coincidences" either in well designed scientific experiments or in day-to-day real life events, the first and most important requisite is to "truly believe" in it's existence. Yes, one may call it blind but true faith. It's a precursor I believe. Once a person/observer is situated in such unwavering faith and elevated an state of consciousness (that can be attained through meditation and yoga practices), the observed experimental data as well as real

live events will reveal results that support the hypothesis. There is a lot more to speak about my interest in this area since childhood. I would like to keep it short here.

Frequently Asked Questions

What GI4QC Forum is About

- Exploring the role of consciousness in relation to quantum outcomes
- Speculating potential use-cases of mystical interactions and developing these ideas with scientific rigor
- Applying the learnings from various research studies to define achievable goals for humanity so as to enhance the 'Happiness' level of the individuals as well as the society
- Promoting self-exploration through meditation and other similar techniques

What GI4QC Forum is NOT About

- Popularizing any particular scripture, philosophy or literature as the greatest of all
- Publishing an ultimate Theory of Everything
- Establishing the supremacy of any country, geography or religion based on their history, teachings, etc.
- Focusing on any particular race, group, institute or region.
- Being a platform for talks and presentations by spiritually inclined people just for personal inner growth without any practical application of the 'elevated consciousness'
