OpenEye®

THE CLOUD VIDEO PLATFORM

OpenEye Web Services simplifies user management, reduces IT labor and overhead, and generates valuable business intelligence for property management operations.

Our powerful cloud-managed video platform gives you the tools you need to improve your security while saving facilities management time and money.

- Reduce Risk
- Increase Intelligence
- Streamline Operations
- Reduce Your IT Burden

REDUCE YOUR HIDDEN COST

Graffiti costs an estimated $12 billion each year to clean up graffiti in the United States[1]

$3K+ A single incident of vandalism costs on average $3,370[2]

The US Property Management industry has grown by 4.0% to reach revenue of $81 billion[3]

24/7 security guards typically costs $12-$20 per hour or over $70,000/year

Give your tenants access to specific cameras for them to monitor such as parking lots, lobby, and exterior doors. Manage their limited access without worrying about anyone gaining access to administrative controls.

Verify that the services you are paying for are done on time and properly with scheduled image reports sent to your email.

Real-time health monitoring keeps you abreast of critical issues including pending hard drive failure, changes in recording retention, network outages, and camera failure or tampering.

No open inbound ports, uses trusted outbound connection, reduces network setup.

Video clips exported to your cloud account can be securely shared via email to law enforcement or insurance companies.

Intelligent search options helps security staff locate incidents faster. Video is tied to analytics and alarm events to immediately pull up relevant incidents.
