AQUACULTURE CATALOGUE-2024

WHITE FECES CARE & CURE 2024

TRUTONE

Presentation
500gm, 1kg

PROTOCOL:

Step 1:
Apply 250 gram per acre in the pond water

Step 2:
From Day 2 on wards use 3-5 grams per kg of feed using butter milk only, continue for a minimum of 7 days. (or) as per the advice of aquaculture specialist.

Caution: Do not use any kind of binding gel while mixing with feed, use only butter milk. Restrain use of any type of sanitisers or disinfectants during this period. Do not use this product in advance.

MICROCYSTIS HARMFUL ALGAL BLOOMS

Many farmers turn to copper sulfate or algocides to remove harmful microcystis, causing them to harvest shrimp prematurely, before the 30th day. In fish farming, the eradication of microcystis using chemicals often results in facing numerous bacterial diseases. Even after the microcyst is eradicated, it tends to resurface because the pond water still contains the "phosphorus that feeds the microcyst".

Moreover, partially deceased microcysts float to the pond's bottom and decompose, causing a dissolved oxygen (DO) issue.

In the Vetwin's method, "REGULATE" doesn't directly eradicate the microcyst but houses microorganisms that effectively restrict the availability of phosphorus in the pond water.

Consequently, the extensive growth of microcyst due to phosphorus is completely eradicated due to its unavailability.

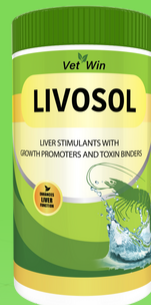

Apply REGULATE in two doses at a rate of 1kg per acre. Administer the first 500gm dose on day 1, followed by the second 500gm dose on day 4.

NOTE: During the Microcystis period, the pond water's pH tends to increase beyond 9. To optimize the product's effectiveness, lower the pH to 8-8.5 by utilizing VETWIN's pH product.

Supplements that yield you gold...!

LIVOSOL
1kg, 5kg pack
Herbal liver & hepatopancreas health supplement
Dosage: 10gm/kg of feed. can be given daily

EVERTONE-MEGA
1kg pack
All round supplement for strength & immunity with minerals, vitamins
Dosage: 10gm/kg of feed. can be given daily

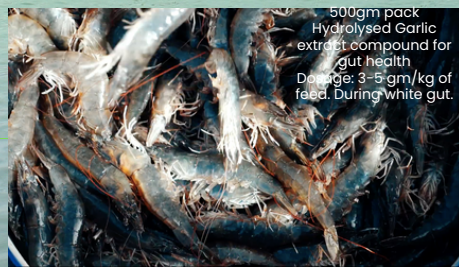

VINSTAR-C50
1kg pack
Vitamin-C feed supplement for immunity
Dosage: 10gm/kg of feed. can be given daily

EVERTONE-MEGA
1kg pack
Vitamins & Amino acid supplement for hepatopancreatic health in shrimp
Dosage: 10gm/kg of feed. can be given daily

ALLIS-MAX
500gm pack
Hydrolysed Garlic extract compound for gut health
Dosage: 3-5 gm/kg of feed. During white gut.

Minerals

K-POTAX PLUS
10kg pack
Mineral with Potassium rich source

MINERVA
10kg pack
Vetwin's premium mineral mix with all minerals, vitamins, probiotics & enzymes

MAGNUS OMEGA
20kg pack
Mineral with Magnesium rich source

Anti-Pollutants

Ammonia binding powder, 500gm, 1kg

Zeolite in granules form 20kg

Powerful Ammonia reducer with probiotics 500gm, 1kg

Sanitisers

Economic sanitiser cum disinfectant 20% 500ml, 1lt, 5lt, 20lt

Sanitiser with iodine complex 1lt, 5lt, 20lt

Triple salt

Sanitiser cum disinfectant 1lt, 5lt, 20lt

6% brominated compound 1lt, 5lt, 20lt

Powerful Sanitiser, disinfectant 1lt, 5lt, 20lt
