

ECO-FRIENDLY WAY OF TREATING AMMONIA

Natural solution to reduce Ammonia
Pinnacle in its rank of Gas Absorption

Presentation:
500g, 1kg

Glyco fraction of the extracts from Yucca schidigera plant is found to be effective in binding the free ammonia from surrounding environment. The use of Yucca schidigera extract in aqua farms has shown the excellent results towards the reduction of the ammonia level, improving the water quality and consequently the farm productivity.

How AMMONIA occurs...

How TRAP-EX oxidises AMMONIA ?

- The compounds present in **TRAP-EX** inhibits enzyme Urease - Blocks the further production of ammonia.
- Yucca Binds any preformed ammonia - Immediate relieve from the ammonia stress.
- The Probiotics neutralizes off flavor of ammonia or others - Removes the irritating odor due to ammonia and prevents further occurrences.
- The Enzymes of **TRAP-EX** breaks down the proteins & undigested matter of the feed.

DOSAGE:

300 - 500 gm / Acre.
mixing it with sand and sprinkling water and broadcast evenly to the entire water spread area of the pond.
Effective when used with **ZEOTRON ULTRA**

COMPOSITION:

Each 1000gram contains

Yucca Schidigera.....	100 gm
Boric Acid.....	100 gm
Peptone.....	10gm
Bacillus subtilis.....	50 billion cfu
Bacillus Pumilus.....	50 billion cfu
Paracoccus.....	50 billion cfu
Rhodococcus.....	50 billion cfu
Silicon dioxide.....	300 gms
Protease.....	300000 units
Amylase.....	100000 units
Lipase.....	75000 units
Cellulase.....	25000 units
Phytase.....	25000 FYT
Carrier & Stabilisers.....	Q.S.
