HELP STOP THE DATA CENTER

Call to Action

This affects all of us! A proposed 190-acre data center "Digital Campus" will affect your health, utility bills and loved ones.

TAKE ACTION

- **Share this information** with anyone who lives in and around the area
- **Attend Apex Town Council meetings** - wear **RED** to show opposition
- **Contact** Apex Town Council and Wake County Commissioners - demand a NO vote on rezoning
- **Sign and share** the petition and join the Protect Wake County Coalition on Facebook

ECONOMIC & HEALTH IMPACTS

- **Diesel Pollution -** 100+ generators release particulate matter linked to asthma, heart disease and premature death
- **Noise & Light Pollution** - Constant fan noise and glare degrade rural charachter and health
- **Fire Risk** - Battery storage equal to 1600 Tesla batteries - beyond Apex FD current capacity
- **Heat Island Effect** - Massive buildings increase local temperatures

Learn more, sign the petition and get involved:

POWER & UTILITY STRAIN

- Facility would use 300MW - more than a 1/3rd of Harris Nuclear Power Plants output
- The entire town of Apex uses only 120MW daily to power the city
- This project competes with homes, hospitals and schools for limited grid capacity.
- This will cause electricity rates to increase for the average consumer - Your power bills will go up - not just in Wake county but across the state.

WATER RISKS

- Will consume approx. 1M gallons of reclaimed water per day for cooling
- No state limits on water withdrawals for data centers
- Local wastewater systems are already strained, major expansions not expected until 2031

WHAT WE NEED BEFORE ANY APPROVAL

- **Local Zoning Controls -** Require conditional use permits and enforceable limits on noise, lighting and size. No potable water usage.
- **Ratepayer Protection** - Developers must pay the full cost of grid upgrades
- **Water & Energy Reporting** - Require full disclosure of projected and actual use
