OPSITE® FLEXIGRID TRANSPARENT FILM DRESSING

OPSITE FLEXIGRID is a moisture vapor permeable transparent film dressing indicated to dress superficial pressure sores, minor burns, scalds, abrasions and lacerations, post-operative wounds, skin grafts, donor sites, and leg ulcers in the final stage of healing and to protect the skin around stoma and under leg bags and from friction and external contamination (prophylaxis against pressure sores). It is also indicated to provide catheter fixation, to retain primary dressings (e.g. INTRASITE™ Gel or ALLEVYN™ Cavity) and to relieve pain in painful diabetic neuropathy.

368-4628	6cm x 7cm	100/Box
368-4630	10cm x 12cm	50/Box
368-4632	12cm x 25cm	20/Box
368-4631	15cm x 20cm	10/Box

OPSITE® FLEXIFIX TRANSPARENT FILM ROLLS

OPSITE FLEXIFIX is a moisture vapor permeable transparent film roll indicated to protect the skin around stoma and under leg bags, to relieve pain in painful diabetic neuropathy, to retain primary dressings. It is also indicated as prophylaxis of pressure sores.

368-66000040	5cm x 10m	Each
368-66000041	10cm x 10m	Each
368-66000375	15cm x 10m	Each

OPSITE® IV3000 TRANSPARENT FILM DRESSING

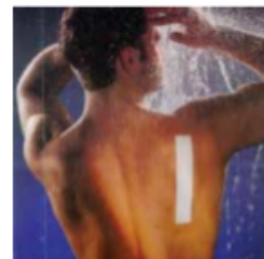

- Reduces risk of infection
- The film in the IV3000 has a unique molecular structure which is much more permeable to water vapour compared to other films.
- IV3000 Dressing keeps the skin drier. This improves adherence and reduces the number of unscheduled dressing changes.

368-4924	6cm x 8.5cm	100/Box
368-4925	10cm x 14cm	10/Box
368-66004009	12cm x 9cm	50/Box
368-4973	14cm x 10cm	50/Box

OPSITE® POST OP DRESSING

- Barrier to bacteria including MRSA
- Reduce the risk of maceration, blistering and pain on removal
- Waterproof and comfortable to wear
- Manage exudate through a highly absorbent pad and breathable film
- Allow constant monitoring on the wound and peri-wound area

368-66000708	6.5cm x 5cm	100/Box
368-66000709	9.5cm x 8.5cm	20/Box
368-66000712	15.5cm x 8.5cm	20/Box
368-66000714	25cm x 10cm	20/Box
368-66000716	35cm x 10cm	20/Box

WOUND CARE / COLOPLAST

BIATAIN® SEASORB ALGINATE DRESSING

Biatain® alginate dressing is a highly absorbent, fiber-free dressing that forms a soft and protecting gel - ideal for highly exuding wounds.

038-3705	5cm x 5cm	30/Box
038-3710	10cm x 10cm	10/Box
038-3715	15cm x 15cm.	10/Box
038-3740	2.5cm x 44cm, Rope.	6/Box

BIATAIN® AG SILVER SEASORB ALGINATE DRESSING

Biatain® Ag alginate dressing with silver is a unique mix of high G (guluronic acid) and highly absorbent carboxymethylcellulose (CMC) with the addition of an ionic silver complex, which releases silver ions in the presence of wound exudate. As exudate is absorbed, the dressing forms a soft, cohesive gel that intimately conforms to the wound surface.

038-3755	5cm x 5cm	30/Box
038-3760	10cm x 10cm	10/Box
038-3780	44cm, Rope	10/Box

COMFEEL® PLUS HYDROCOLLOIDS

Combines the benefits of a see-through hydrocolloid dressing and superior exudate management. A breakthrough in hydrocolloid technology means unsurpassed absorptive capacity that helps you manage low-exudate wounds better than ever. Unique, adaptable polyurethane top film allows excess moisture to evaporate while maintaining the proper moist healing environment.

- Adhesive outer border keeps dressing in place, even over boney prominences.
- Residue-free removal helps prevent irritation.
- Adaptable polyurethane top film allows excess moisture to evaporate while maintaining the proper moist healing environment.
- "No-touch" system allows easy application while wearing gloves.

038-33146	4cm x 6cm, Regular	30/Box
038-33110	10cm x 10cm, Regular	10/Box

SEA-CLENS® WOUND CLEANSER

Sea-Cleans® is a cost effective, saline-based wound cleanser designed to loosen debris from the wound bed without interfering with the healing process

038-1063	178mL	Each
038-1061	355mL	Each

PURILON® HYDROGEL

Purilon® Gel is primarily intended for the treatment of necrotic and sloughy wounds, e.g. leg ulcers, pressure ulcers and diabetic foot ulcers.

038-3906	8gr	10/Box
038-3900	15gr	10/Box

WOUN'DRESS® COLLOGEN HYDROGEL

Woun'Dress® Collagen Hydrogel promotes autolytic debridement by rehydrating and softening dry wounds and necrotic tissue. Hydrogels provide a moist environment facilitating optimal wound healing.

038-1166	28g Tube	Each
038-7690	84g Tube	Each

TRIAD® HYDROPHILIC WOUND DRESSING

Triad® Hydrophilic Wound Dressing absorbs excess wound exudate while retaining a moist wound environment. Can be utilized when conventional dressings are not feasible. Zinc oxide-based hydrophilic paste gently adheres to moist wound beds. Protects peri-wound skin.

038-1967	170g Tube	Each

NANOVA™ THERAPY SYSTEM

The NANOVA™ Therapy System is a compact, manually activated single-patient use Therapy Unit that is coupled to an absorptive Dressing to form a Negative Pressure Wound Therapy System suitable for use on shallow-cavity chronic and acute wounds. The NanoVA™ Therapy Unit has been designed with both care giver and patient in mind.

- Manual priming – no complicated training required.
- 1–3 compressions of the pump delivers regulated negative pressure that can be re-primed at any time.
- Once activated, negative pressure is maintained at -125 mmHg.
- Single-patient use Therapy Unit can be used with multiple dressings as required for up to 30 days.
- Silent, light-weight and small; can easily be carried in a pocket.

315-NANTU/R6	Therapy System	Each
--------------	----------------	------

NANOVA™ THERAPY DRESSING

The NANOVA™ Dressing delivers negative pressure to the wound bed whilst absorbing and locking away wound exudate. The dressing has a silicone wound contact layer that is designed to be non-adherent. The adhesive border features DermaTac™ Protective Seal Technology, this a hybrid material combining silicone and acrylic adhesives that provide an effective seal for negative pressure, yet enables easy repositioning or removal minimising trauma to the peri-wound skin.

- Wound fluid is locked within the core of the dressing to help minimise the potential for maceration.
- Continues to absorb exudates if negative pressure is lost.
- Dressing may be placed in any orientation without compromising absorptive capacity or the delivery of negative pressure.

315-NANGFS/R6.S	Small, 18cm x 14cm	3/Box
315-NANGFM/R6	Medium, 18cm x 18cm	3/Box

RESTORE® CONTACT LAYER FLEX DRESSING WITH TRIACT TECHNOLOGY

- Highly conformable – Can be shaped to fit contours of deep or irregular wounds, and in difficult anatomical locations
- Non-adherent – Virtually pain-free dressing removal for enhanced patient comfort
- Maintains a moist wound interface – Forms a gel in the presence of exudate
- Minimizes trauma to the wound bed – The dressing's gentle tack helps keep it in place over the wound

687-506487	5cm x 5cm	10/Box
687-506488	10cm x 12.5cm	10/Box
687-506489	15cm x 20cm	10/Box

RESTORE® CONTACT LAYER SILVER DRESSING WITH TRIACT TECHNOLOGY

- Non-adhesive, non-occlusive antimicrobial wound contact dressing
- May help to reduce infection in low to moderately exuding partial and full-thickness wounds
- Shown to be effective against bacteria most frequently associated with wound infections
- Contains silver sulfate

687-509341	10cm x 12.5cm	10/Box
687-509342	15cm x 20cm	10/Box

RESTORE® HYDROGEL DRESSING

- Maintains moist healing environment in partial and full-thickness wounds
- Clear, viscous gel
- Up to 72-hour wear time

MEDIHONEY® DRESSINGS

MEDIHONEY® dressings contain 95% active Leptospermum Honey, which has been shown to have several properties which assist in promoting an optimal healing environment for chronic wounds and burns that have not progressed with basic, first line treatments. Through their high osmolarity, the dressings help to cleanse the wound and remove devitalized tissue. The dressings are designed to manage varying degrees of exudates.

Attends™

Better protection for the individual, enhanced efficiency for the caregiver
Attends' product selection is designed to meet a wide range of incontinence care needs. Products are arranged in a convenient tier system, allowing for easy selection of the right product for varying incontinence needs. Leakage control, skin care, and comfort are the driving forces of performance in all tiers of attendance products.

	Light Pads 	Guards for Men 	
	Light Pads 	Insert Pads 	Undergarments 
	Shaped Pads 	Underwear 	Briefs 
	Shaped Pads 	Briefs 	
	Shaped Pads 	Briefs 	
	Briefs 		

How do I know if this is the right product for me?

Choosing the right product will ensure the correct level of skin care, leakage control, and comfort. The Attends Total Incontinence Protection System® (T.I.P.S.) Chart is a guide through Attends products "at a glance" for quick and easy product selection.

The T.I.P.S. Chart arranges Attends body-worn products in a colour-coded tier system to show the different absorbency levels available. Products with six droplets are our most absorbent and highest performing, while products with one droplet would be for lighter incontinence needs. We can help find the right product for you!

Features & Benefits

Attends® products have a unique variety of features that make them the best choice for all incontinence needs.

Throughout this catalogue you will see the many features Attends Health care products have to offer. Many of them are represented by the list of icons on the following page. You will see their descriptions to better understand the features and why they are so beneficial.

Attends® are now using an improved Odour Control Super-Absorbent Polymer (SAP) inside our Briefs and Shaped Pads!

BRIEF SELECTION & APPLICATION TIPS:

- Measure around the hips or waist, whichever is largest.
- When sizing, remember Bigger is not Better. Better Fit = Better Containment.
- Angling the top tape tabs down and the bottom tape tabs up (as illustrated in the brief pictures below) can help strengthen the attachment to the brief and serves to improve the fit on some residents.

BRIEF COLOUR CODING:

Attends Briefs® and Confidence Briefs are colour coded by size for an easier size recognition (except for Attends Briefs® Waistband Style, in which all sizes are white). The poly backsheet colours are as follows:

**BRIEF SIZING GRID:**

Our unique sizing grade is also colour-coded by size, and incorporates an easy way to find the correct size information already available. Simply take the user's weight and height, then find the meeting point of the two numbers. This box is colour-coded to the recommended size*. If a person weighs more than 250 pounds and has a waist size larger than 63 inches, they may fit into Attends Breathable Briefs™ size XX-large (which fit 63"-70") or Attends Bariatric Briefs® size XXX-large (which fit 70"-90").

FIND USER'S HEIGHT & WEIGHT:		WEIGHT IN POUNDS

*Sizing is not a perfect science, therefore the sizes given in the chart above are recommended only, not guaranteed.

WETNESS INDICATOR:

All Attends briefs have a wetness indicator on the outside of the brief that runs from the front of the brief to the back. The wetness indicator can help in determining when the brief should be changed and assist with proper application of the brief.

A wetness indicator is a convenient way to let a caregiver know if a brief needs to be changed. The wetness indicator will change colour from yellow to blue when the user has voided to let you know.

When applying a brief, the wetness indicator can help a caregiver know when to position to breathe correctly. The top of the wetness indicator on the back side of the brief should be placed at the person's coccyx. This will help center the brief properly, and most importantly it will help position the brief so that there is enough product to bring up through the groin.

FEATURES & BENEFITS

Rapid Lock System®

Technological innovation designed with a unique combination of materials that provide superior performance and leakage control:

- 1) A microporous layer **wicks** fluid rapidly away from the skin.
- 2) Perma-Dry® fibers **channels** fluid throughout the brief
- 3) Hygard® polymer **locks** fluids in the core of the product, and
- 4) The unique funnel design of the microporous layer **blocks** fluids from resurfacing.

Breathable

These briefs feature breathable side panels that allow more air flow for drier, healthier skin, but still have a moisture-proof lining along the center of the brief to prevent leakage. They also have a soft, cloth-like covering for quiet confidence.

Comfort Flex-Tabs

These tabs are made to attach to the cloth-like covering on our Breathable Briefs. They are not sticky tape tabs; instead they use a hook-and-loop type refastening system. They are soft, flexible, and can refasten anywhere on the brief.

Hook-and-loop tabs need to be properly adhered to the brief to achieve a strong attachment. To do this use the **PRESS and TUG** technique:

PRESS the tab down firmly against the brief, THEN...
TUG gently sideways on the tab (this will help to secure the tab to the brief).

SDO®: Skin wellness, Dryness and Odor control

SDO means you have the unique Attends® technologies in place to create the healthiest possible skin environment:

- 1) Treated fibers stabilize the pH of urine, which retards the growth of bacteria, reducing skin irritation and infection and maintaining **skin wellness**,
- 2) The unique design of the core provides increased resiliency and continues to function even after multiple voids for maximum **dryness**, and
- 3) Reducing the pH of the urine also reduces the growth of odor-causing bacteria and ammonia for **odor control**.

Easy-Fit Tapes

Innovative 3-piece refastening system allows repositioning of the tape tabs without tearing the brief.

Regular Size

Innovative sizing option utilizes the width of a large brief and the length of a medium brief, providing better fit for users and reduced costs. This size selection is excellent for residents that are less than 5' 6" tall but have hips or waist measurements of 44 to 56 inches.

Latex Free

ALL Attends Healthcare products are Latex Free.

Discreet Packaging

Many Attends Healthcare products are available with discreet outer shipping cases for customer privacy and dignity.

305-MDTIU3TEIPNK	34" x 48"	24/Case
------------------	-----------	---------

**QUICK-DRY® REUSABLE UNDERPAD**

- Face fabric on underpads quickly wicks fluid and is dry to the touch in minutes
- Unique blend of fibers in the soaker layer help absorb and distribute fluid more effectively
- Breathable polyurethane film helps block fluid, but allows moisture vapor to escape, creating a cooler, drier and more comfortable patient environment
- Bonded construction thins the pad for less bulkiness with no decrease in absorption
- Lays flat with no bunching or rolling

320-MDTIU8SEFBLU	34" x 36"	Blue Backing	Each
320-MDTIU8SEFBLU	34" x 36"	Blue Backing	24/Case

**SWIM BRIEFS**

These swim briefs allow water to easily pass through while keeping solids securely contained and out of the pool. With quick drying nylon and a soft terry liner for comfort, the wrap style design makes it easy to change while the adjustable waist with added ties ensures a secure fit every time. Worn alone while swimming and with a diaper if needed when out of the water.

VaPro Plus Pocket is a closed system with an integrated 1,000 ml collection bag.

VaPro Line of Hydrophilic Intermittent Catheters:

- Are ready-to-use hydrophilic catheter with pure water technology
- Have a protective sleeve which allows the catheter to be gripped anywhere
- Have a protective tip that helps shield the sterile catheter from bacteria located in the first 15 mm of the distal urethra
- Have smooth eyelets that help ease of insertion and withdrawal

SAGE® PREVALON® HEEL BOOT

Prevalon helps minimize pressure, friction and shear on the feet, heels and ankles of non-ambulatory individuals. By off-loading the heel, it delivers total, continuous heel pressure relief. Its design also helps reduce the risk of foot drop. Outer surface is strong, ripstop nylon the same material used in parachutes and outdoor gear. Outer covering repels liquids and makes it easy to wipe clean. One size fits all.

211-SAG7300..... Heel Protector Each

SPAN® HEEL MANAGER

In addition to fully offloading both heels, the Span-America Heel Manager's gentle slope aids in circulation - key for patients with diabetes, neuropathy, and peripheral vascular disease.

- Fully offloads heels with skin-friendly design
- Extreme comfort and support for both legs
- Wider – up to 30% more surface area
- Shear Transfer Zone™ cover technology
- Heat and moisture reduction capabilities

A45-44900 Each

POSEY® BED CRADLE AND FOOT SUPPORT

Posey Bed Cradles help keep sheets and blankets off the patient's feet. The sturdy steel frame securely clamps to the mattress and can be easily removed when changing bed sheets. Four piece stainless steel construction enables compact storage when not in use. Fits standard hospital or nursing home beds. Optional cotton foot drop support cover secures with strap and is machine washable.

SHEAR COMFORT XD1900 MEDICAL SHEEPSKIN PRODUCTS

Pressure Smart XD products are made from 100% Australian wool and offer a new level of pressure sore, bedsore and decubitus ulcer prevention. Because of the wool fibres ability to contour and cushion the body, Pressure Smart XD reduces resistance to movement and friction. Wool absorbs up to 30% of its weight in water without feeling wet, is a key factor in preventing ulcer development. Warm in winter and cool in summer. Wool is naturally anti-microbial and antibacterial. All Shear Comfort products are machine washable in water up to 80°C for disinfection and cross infection control.

SHEAR COMFORT® SUPERIOR OVERLAY

A full bed overlay. Suitable for long term patients where Shear, Friction and pressure are a concern. 75cm x 150cm.

514-002633 Each

SHEAR COMFORT® PRESSURE CARE ASSIST

A 70cm x 30cm strip of sheep skin covering a width of a single bed with linen flaps to tuck under the mattress. For a person with the possible risk of ulceration to the sacrum, heels, shoulders or head.

514-002169 Each

SHEAR COMFORT® CHAIR CUSHION

Can be used directly on a seat or back of a standard wheelchair. Each cushion comes with Velcro straps to hold it in place around cushions or wheelchair canvasses. Buy 2 for complete seat & back protection as shown.

514-002152 Each

SHEAR COMFORT® CALF PLATE PROTECTOR

Designed to ease pressure areas for wheelchair patients. Sheer Comfort Calf Plate Protectors are adaptable for a range of applications.

SHEAR COMFORT® FOOT PLATE PROTECTOR

Sheer Comfort Foot Plate Protectors are adaptable for a range of wheelchairs.

514-002126 Pair

SHEAR COMFORT® ELBOW PROTECTOR

The elbow is a common problem point for pressure ulceration and with its limited blood supply is slow to repair. Good for use in a bed or in a wheelchair.

514-002664 Pair

SHEAR COMFORT® HEEL PROTECTOR

20% of all pressure ulcers occur at the heels. The Sheer Comfort Heel Protector protects the heels wherever the feet are placed.

514-002275 Each

SHEAR COMFORT® PALM PROTECTOR

Protect where contractures of the fingers press the nails into the palms of the hands. Also offers moisture absorption reducing the likelihood of maceration. Fits either right or left hand.

514-003074 Each

SHEAR COMFORT® 1L SHAMPOO

Formulated to protect the softness and therapeutic advantages of Sheer Comfort with the inclusion of an antibacterial which protects against bacterial growth, eliminating cross infection and preventing odours. Also contains Tea Tree Oil, an effective deterrent against dust mites - a known allergen to asthmatics.

514-000905 Each

CURAD® KNITTED HEEL & ELBOW PROTECTORS

- Slip-on protector has a double layer of foam to protect pressure points
- Seamless, elastic mesh knit stretches and conforms to body while keeping skin cool
- Washable
- Universal

320-MDT823340 Pair

HEEL PROTECTOR, SYNTHETIC FUR, ECONOMY

These Heel Protectors are made with synthetic polyester pile with velcro closure for ease of application and removal. Sold in pairs, one size fits all

4AA-79-81050 Pair

HEEL PROTECTOR, SYNTHETIC FUR, DELUXE

- Protects heel from contact with sheets.
- Bottom openings provide necessary ventilation.
- Well-designed closure holds protector firmly onto heel.

320-MDT823290 Pair

ELBOWLIFT® SUSPENSION PAD

Protects the Olecranon and the Olecranon Bursa from Friction Burns and Pressure Ulcers Relieving elbow pressure and preventing friction is a challenge. The Elbowlift® Suspension Pad meets that challenge by elevating and cushioning the elbow, protecting the sensitive olecranon and olecranon bursa. The fabric cover allows the elbow to move across the sheets comfortably.

Adjustable, cushioned strap wraps around arm to keep pad in place

Smooth backing for improved patient movement

Center hole relieves pressure and functions as a placement guide

SPENCO® FOOT PILLOW

Every Spenco® Silicore® Padding Product is made with Spenco® Silicore® Fibers, unique siliconized hollow core shafts that don't mat down, retain their loft and allow air flow. The silicone coating lubricates each fiber to reduce friction and shear force while preventing moisture penetration or retention. The breathable cotton/polyester fabric is fully washable, dryable, and radio-translucent.

Spenco® Silicore® Padding Products pass the requirements described in 16 CFR Part 1632 Standard for the Flammability of Mattresses and Mattress Pads, (FF-72, Amended). Bed, Full Wheelchair and Chair Pads are also reversible with a moisture resistant nylon on the other side.

PREVAMATT® DELUXE FOAM SUPPORT MATTRESS

The PrevaMatt Deluxe features Visco Memory foam in the slope heel section and die cut high density foam in the torso and head sections. Incorporates a sloped heel section to redistribute pressure in the delicate heel and lower leg area. Firm perimeter foam provides added stability during resident transfer and helps resident safety by preventing entrapment between mattress and rails. Strategically located cuts in mattress base promotes easier flexing during bed frame articulation which reduces wear and tear on mattress/cover and prolongs mattress life. Easy to clean cover comes standard in four way stretch material. Available with optional built up side bolsters. Designed for moderate to high risk patients. All mattresses are flame and fire retardant and meets or exceeds the new CAN/ULC-S137 standard.

SPECIFICATIONS

over-all length – 76", 80" or 84" over-all width – 36"
 Thickness - 6" (8" with Side Bolsters) weight capacity – 500lbs

PRIMA-GEL® DELUXE MATTRESS

The Prima-Gel Deluxe Mattress combines the comfort and pressure reduction of foam therapeutic mattress with the pressure relief and temperature regulation of gel. In this unique process our therapeutic foam core mattress is covered with a 3/4" pillow top gel honeycomb topper in the torso and foot section of the mattress to deliver unparalleled comfort, temperature control and wound prevention. The gel topper distributes the pressure more evenly over these regions resulting in better pressure interfaces. The honeycomb design of the gel allows for better temperature control around the sensitive pressure areas of the body. The Prima-Gel Gel mattress has an incorporated high density foam perimeter to aid in transfers as well as to prevent bed entrapment. The special Recovery 5 Stretch cover provides fluid protection as well as a softer feel and stretch compared to regular nylon covered mattresses.

PRESSURE RELIEF

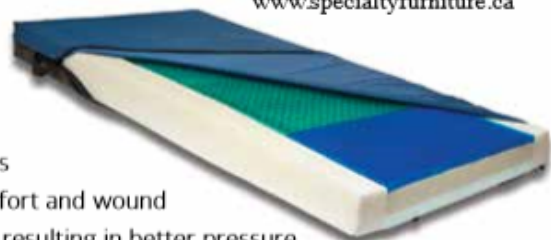

- 3/4" gel honeycomb comfort topper in torso and foot sections regulates temperature reducing perspiration and provides immersion for pressure reduction as well as increased comfort
- Dual density foam core with sloped heel zone to relieve pressure in sensitive foot region
- Firm perimeter border Allows for easier transfers and a firm supportive edge to meet all bed entrapment guidelines
- Recovery5 cover ensures the mattress is protected from fluid while still allowing maximum immersion with its stretch capabilities

SPECIFICATIONS

Overall Length - 80"	Weight Capacity - 500lbs
Thickness - 6"	Warranty - 7 Years on Core + 2 Years on cover
SPFPRIMAGDX80	Each

PRIMA-GEL® ELITE MATTRESS

The Prima-Gel Elite Mattress combines the comfort and pressure reduction of foam therapeutic mattress with the pressure relief and temperature regulation of gel. In the critical torso section of the Prima-Gel Elite mattress we incorporate a larger and deeper honeycomb gel design to provide maximum pressure relief and temperature control for Stage I-IV pressure ulcers. The sensitive heel section of the Prima-Gel Elite mattress is covered with a 3/4" pillow top gel honeycomb topper to deliver unparalleled comfort and wound prevention. The gel topper distributes the pressure more evenly over these regions resulting in better pressure interfaces. The honeycomb design of the gel allows for better temperature control around the sensitive pressure areas of the body. The Prima-Gel Gel mattress has an incorporated high density foam perimeter to aid in transfers as well as to prevent bed entrapment. The special Recovery 5 Stretch cover provides fluid protection as well as a softer feel and stretch compared to regular nylon covered mattresses.

- Full Torso Section large honeycomb gel pad for maximum pressure relief, comfort and temperature control in critical pressure area of the mattress
- 3/4" gel honeycomb comfort topper in foot section provides immersion for pressure reduction as well as increased comfort
- Dual density foam core with sloped heel zone to relieve pressure in sensitive foot region
- Firm perimeter border Allows for easier transfers and a firm supportive edge to meet all bed entrapment guidelines

Mattress Features and Benefits

- Non-powered mattress replacement converts to alternating pressure therapy with addition of optional control unit
- Four-zone system (head, shoulder, torso and foot) inner air core reproduces the surface pressure profile of a therapeutic low air loss mattress
- P.R.O. Technology valve maintains optimal air pressures in each therapy zone for superior pressure redistribution regardless of patient weight and profile
- One-inch viscoelastic topper enhances pressure redistribution and patient comfort
- Surrounding firm perimeter provides stability during patient care & patient safety by eliminating gaps between frames and siderails
- Horizontal air tubes are superior to other manufacturers vertical tubes as they provide better pressure relief & do not kink if bed is latched
- Self-calibrating design needs no manual inflation
- Nylon therapy pad is standard, waterproof & is a low friction and low shear surface

Feature	SPF ES2 Control Unit
Dimensions	7.5" w x 12.25" h x 5.5" d
Comfort Settings	5
Cycle Times	5, 10, 15 Minutes
Modes of Operation	Three - Autofirm, alternating and therapy
Lockout	Yes

Clinical Indications

Pressure Redistribution: Stage I – IV Pressure Ulcers*; Rehabilitation; Burns; Neurology; Dermatology; Amputations
 Pain Management: AIDS; Arthritis; Oncology

*In the non-powered mode, the P.R.O. Matt Plus is indicated for prevention through Stage II pressure ulcers. With the addition of an optional control unit and based on individual patient assessment, the P.R.O. Matt Plus may be used for the treatment of uncomplicated stage III or IV pressure ulcers.

Maximum Weight Capacity*: 500 lbs

Warranty: Mattress: Five-years, non-prorated; Cover: Two-year

The Dermafloat® APL is a combination alternating pressure and low air loss therapeutic mattress replacement system designed for the treatment and prevention of pressure ulcers up to Stage IV. The Dermafloat® LAL is a true low air loss only mattress with higher air flow circulation than the APL

Mattress features:

- Twenty individual cells help to evenly distribute resident's weight and maximize pressure relief
- Integrated low air loss delivery system: Up to 40 liters airflow per minute when the alternating cycle is complete or unit is in static therapy mode
- Two-way stretch therapy pad—low shear and low friction, treated with an antibacterial and antifungal agent and is vapor permeable
- ChairRails risk management side air bolsters (Removable if not needed)
- Mattress size: 36" W x 80" L x 8" D
- Maximum weight capacity: 350 lbs.

Control unit features:

- Three alternating cycle times (APL only)
- Eight comfort control settings maximizes resident compliance and promotes healing.
- Fowler Boost inflates sacral section enhancing pressure relief when head of bed is elevated at 30° or greater
- Automatic panel lockout to avoid unwanted or unintended adjustments
- Audible power failure alarm with reset
- CPR quick deflation
