7 Generations Medical, Education and Supplies

"In every deliberation, we must consider the impact on the seventh generation"

We at 7 Gen Medical, believe that the stewardship or sustainability of the future is a basic ingredient for generational wellness.

Seven generation stewardship is a concept that urges the current generation of humans to live and work for the benefit of the seventh generation into the future. It originated with the "Great Law of the Iroquois" – which holds appropriate, to think seven generations ahead and decide whether the decisions they make today would benefit their children seven generations into the future. It is frequently associated with the modern, popular concept of environmental stewardship or sustainability

At 7 Gen Medical, we too are helping to improve the wellbeing of the 7th generations ahead. As written in the Great laws of the Iroquois, there is an obligation to base decisions to promote the best outcomes for our children, for 7 generations into the future.

Our mission, goals and responsibilities hold true to these beliefs. Through sustained education in prevention and best health practices, along with the latest technologies in products, services and applications, we at 7 Gen are committed to providing the tools to assist in a more educated, evidence-based decision for the communities' best health and wellness practices. These decisions will surely benefit into the future of your 7th generation
