

FAMILY PHOTOS

What do we wear?

When it come to family photo shoots, think coordinating not matching.

I recommend that you pick one main color and work to find complementary colors that coordinate. Different shades of the same color or a simple patten work best. If you stay with neutrals add an accessory with a pop of color (belt, hair bow, scarf or jewelry).

TIP: T-shirts with Logo's or Large Graphics sometimes tend to be distracting.
Keep is simple, less is more.

There are endless possibilities, have FUN with it and remember to be comfortable.

Beach Family Photo Tips

- Wear SUNBLOCK on the days leading up to the shoot, we don't want red skin and awkward tan lines.
- Take off your sunglasses and leave them in the room, your eyes need to adjust to the sunlight so you're not squinting during photos.
- Please leave all pockets empty (cell phones, keys, etc.)
- It will most likely be windy, your hair won't be perfect (hairspray and bobby pins help) if you bring a hair tie, please keep it off your wrist.
- If you have small children, bring a reward. Taking pictures is hard work for kids, and some adults to!
- There will be people around, I will do my best to choose spots with as few people around as possible!
- Make sure you eat, even just a snack. No one is happy when they are hungry!
- If there are young kids, please try to have them rested. A nap before the session is always a good idea, especially if they have been in the sun all day.
