

RECYCLING SERVICES

Asphalt & Concrete Recycling Services

At Yannuzzi, we take pride in being a recycling leader.

As trusted demolition experts, each day we see the real-life importance of redirecting valuable materials out of landfills. Every ton of demolition waste that can be reused in the construction of a new building, road or structure is a win for both the environment and the pocketbook. That's why Yannuzzi is proud to say that we have recycled over 13 million tons of concrete, brick/block, pavers, asphalt and rock since 1998.

Yannuzzi operates a state-of-the-art recycling yard with the latest processing and sorting. As one of Somerset County's leading recycling facilities, we excel at taking a pile of concrete, rock and asphalt and turning it into a valuable, environmentally friendly product.

Sustainable building practices are at the heart of Yannuzzi values. We have molded our business and daily operations around maximizing the amount of material that we collect and recycle. By redirecting this raw material away from a landfill, we are able to improve the environment, be good stewards of global resources, and help our clients achieve LEED credits.

Recycling Facilities

Our Class "B" recycling facility has been in operation since 2008 and is licensed by the New Jersey Department of Environmental Protection (NJDEP) for concrete and asphalt. Our team of experts uses the most up-to-date machinery and processes to ensure proper reclamation and processing of materials.

At our recycling yard we accept metals for processing, and will crush your discarded concrete, asphalt, rock, pavers and blocks into a variety of sizes so that it can be re-used for other purposes, such as landscaping, concrete manufacturing or road bed construction.

INBOUND MATERIALS

- Clean Concrete
- Brick, Block or Brick/Block Mix
- Asphalt/Millings
- Asphalt Mix
- Concrete/Brick/Block
- Slate/Granite/Marble
- Rock: 24" Minus
- Dirt

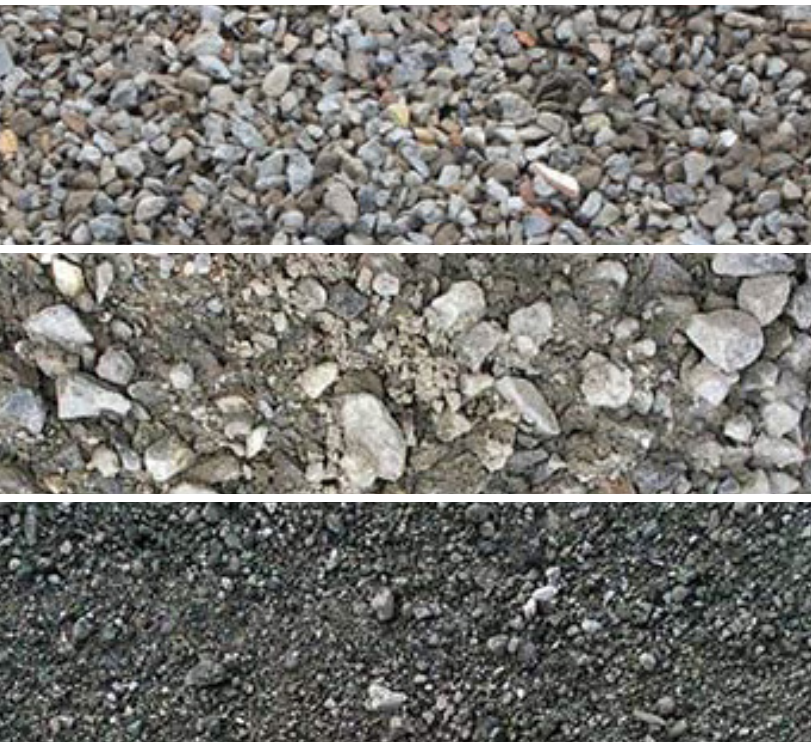

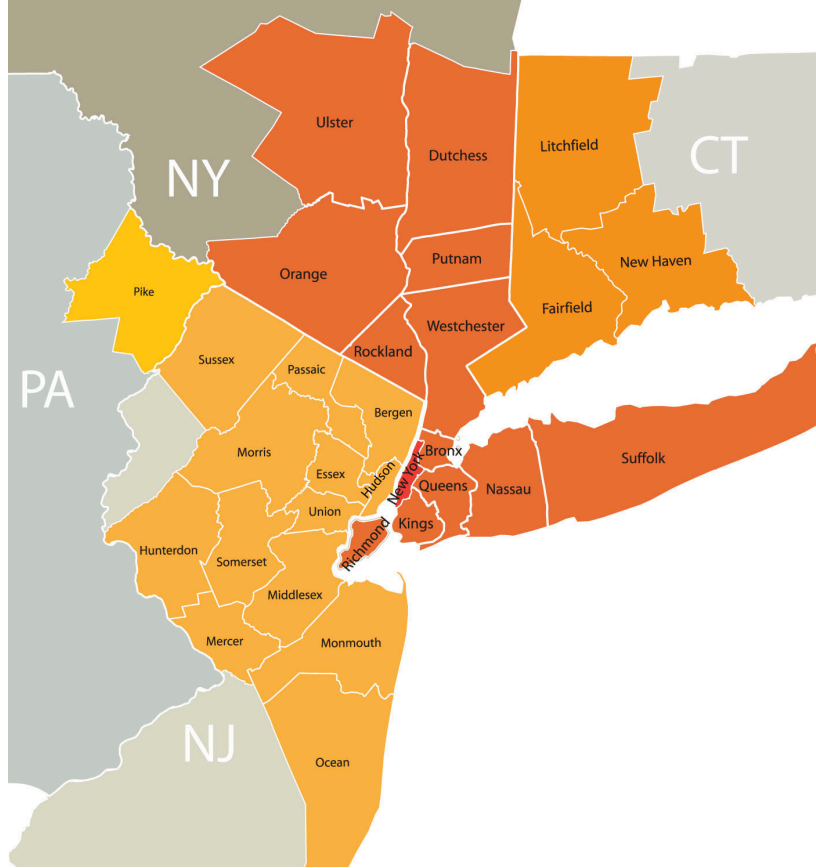

OUTBOUND MATERIALS

- ¾" RCA Commercial Blend
- ¾" RCA Blend (NJDOT Gradation)
- ¾-1 ½" RCA Clean
- 2 ½" RCA
- RCA Stone Dust
- Red Brick Chips
- Processed 1" Minus
Recycled Asphalt Aggregate
- Crushed Quarry Stone
(NJ, NY, PA, DOT Certified)
- Top Soil & Fill Soil
- Common Fill

Recycling Services & Recycled Product Where You Need It

Yannuzzi makes recycling easy. We accept inbound materials by truck and rail, and can arrange for pick up directly from your demolition site. For your construction needs, our quality recycled materials can either be picked up in person or delivered directly to your site by truck or rail. For your convenience, we also offer recycling yard container services for our materials.

We will work with you to ensure that your experience is fast and convenient, leaving you more time on the job site to get work done.

SUPERIOR Recycled Building Materials

Our recycled materials provide a cost-effective, sustainable solution for all of your construction needs.

Yannuzzi provides quality raw materials for your construction site. Using our jaw crusher and impact crusher, we produce crushed material in a variety of sizes for all your building requirements, from stone dust to aggregates ranging from $\frac{3}{4}$ " to $2 \frac{1}{2}$ ".

DEMOLITION SERVICES

YANNUZZI
GROUP

DEMOLITION

The Yannuzzi Group is a leader and innovator in the demolition and deconstruction industry.

Our modern fleet of heavy equipment and our well-seasoned staff of professional project managers, estimators and demolition operators are ready to tackle your demolition project and get your structure demolished quickly and safely.

Yannuzzi specializes in heavy equipment demolition and is proud to work with private companies as well as municipal, state and federal agencies to provide safe, effective demolition of sites. We are happy to demolish structures of all sizes, from single-family residences to multistory high rises and factories. To ensure a quick and efficient demolition, we always ensure that all regulations and codes are strictly followed.

As experienced demolition professionals, the Yannuzzi team will guide your project through each stage of the process, from planning, decontamination and demolition through materials sorting and site preparation.

Our Commitment to Sustainability

We take our role in preserving our planet seriously.

We know that construction waste can produce thousands of tons of wasted material that is bound for a landfill. That's why our demolition projects also involve deconstruction, which is the art and science of removing the recyclable and valuable parts of a building so that they can be given new life. By identifying the reusable parts of each building we demolish, we help to ensure both a steady supply of low-cost recycled building materials for construction and a better future for our community.

DEMOLITION SERVICES

- Building Implosion
- Building Deconstruction
- Manual Demolition
- Building & Commercial Demolition
- Residential Demolition
- Industrial & High Reach Demolition
- Emergency Demolition
- Concrete/Asphalt Pavement Demolition & Removal
- Partial, Selective & Interior Demolition
- Plant Decommissioning
- Construction Site Preparation

INDUSTRIAL & HIGH REACH DEMOLITION

Yannuzzi is the trusted leader in industrial and high reach demolition. Using high reach excavators fitted with shear attachments and hydraulic hammers, we will demolish tall buildings piece by piece in a highly controlled manner. The Yannuzzi team will carefully cut the structure apart, separating materials for recycling and reuse.

For industrial and military sites faced with chemical, unexploded ordnance or environmental hazards, Yannuzzi is the experienced choice. We specialize in decommissioning paper mills, chemical plants and other industrial facilities and will coordinate the rehabilitation of contaminated sites. Our industrial demolition team has the most up-to-date training, experience and expertise, allowing them to work safely and in full compliance with EPA regulations with a wide range of hazardous materials such as asbestos and lead.

Residential Demolition

Yannuzzi has deep expertise in residential demolition and has successfully demolished a wide range of residential buildings such as single-family homes, apartments and condominiums. Our highly skilled personnel will assess the structure and provide the most cost-effective and technically appropriate option for demolishing the building and returning the site to a usable state.

Residential demolition requires an expert touch because the homes being demolished are often in very close proximity to others in the neighborhood. Yannuzzi uses state-of-the-art demolition practices to ensure a safe, clean demolition site so that the families living around the demolition site are protected and are able to go about their daily lives with minimal disruption.

Emergency Demolition

When a building has been damaged beyond repair and presents a hazard to the community, you can count on Yannuzzi to act quickly to alleviate the danger.

Yannuzzi performs demolitions of unsafe structures for insurance companies, municipalities and businesses. We have the correct equipment, experience and knowledge of local expedited regulations and codes required to be able to respond quickly to emergencies. Our professional team will demolish the structure so that the demolition site can quickly be turned into a construction site, and lives and property can be rebuilt.

Building Implosion

Sometimes the most cost-effective and least disruptive demolition option is building implosion. Yannuzzi has the skill and experience to ensure that the building is well prepared for the implosion and that the explosives are set and detonated in a safe manner. Although the implosion itself only takes a few seconds, the site must be carefully prepared over a period of weeks or months before the final event to ensure a safe demolition. Yannuzzi will remove all valuable and potentially damaging materials such as glass or drywall before the explosives are set.

Is implosion right for your structure? As demolition experts, the Yannuzzi team will consult with you to determine the best demolition option for your site and circumstance.
