Inclusive Change Management

Typical change models assume people will accept all change. We know that's not true. People can reject change and be caught in confusion. SSW PRO recognizes this ability and focuses exclusively on the personal side of change fostering unique engagement, inclusion, and critical reflection to support information based decisions and actions.

The Model Works In 2 Parts:

Including & Processing Feelings

Surprise
Conflicted or Champion
Actions
Receptive or Rejective
Explore
Decision / In-Decision

Making Your Own Plan

Strategy / Plan
Oppportunity
Way Forward
Hope / How
Actions
Take Ownership

SSW PRO facilitates change inclusion for your people. Replaces survey expense, fatigue, distrust, develops critical reflection in real time, and gives the organisation live data insights into the effects of change and culture. Transforming the way we manage organisational change.
