

**TAPAS Network Meeting****7 March 2022, 14:00 – 17:00****Should air cleaners be used in schools?**

14:00	Welcome and introduction	Professor Paul Linden, University of Cambridge
14:05	Issues associated with standardisation of air cleaners	Professor Nicola Carslaw, University of York
14:20	Does air cleaning have a role in schools? No role without monitoring	Achim Haug, AirGradient
14:35	Ultraviolet lighting to prevent the airborne transmission of viruses	Dr. Kenneth Wood, University of St. Andrews
14:50	Tailoring filtration materials to remove challenging pollutants	Tom Sturgeon, Immaterial
15:05	Breakout session 1: 'How should air cleaners be deployed in schools'	
15:25	Break	
15:40	Implementation, implementation, implementation: Lessons from the National Class-ACT trial	Professor Mark Mon-Williams, University of Leeds
15:55	Using CO2 as a Ventilation Clue?	Dr. Dustin Poppendieck, National Institute of Standards and Technology (NIST)
16:10	How can science inform policy on use of air cleaning in schools?	Professor Paul Monks, Department for Business, Energy & Industrial Strategy
16:25	Breakout session 2: 'Do CO2 monitors provide a measure of air pollution?'	
16:55	Summary and close	Professor Paul Linden, University of Cambridge
