

# Maintenance

## • Tips and Skills •

### • Lub & Oil •

- ★ 1. Apply lub before rust growing
- ★ 2. Lub can remove noise from brake and gear
- ★ 3. Lub oil protects ebike from water damage
- ★ 4. WD40 can clean and drive out moisture
- ★ 5. WD40 frees sticky mechanisms

### • Wrench & Screwdriver •

#### Loose screws?

Make sure all screws are tightened before riding.

#### Squeaks or shaking?

Part with thread can get loose. Use wrench to fix it!

It is the user's responsibility to do regular maintenance (every 1000km or 1 month) on ebike. Inadequate maintenance will accelerate tear and wear damage on ebike.

Loose screw or thread can be dangerous.

Consequence(s) caused by inadequate maintenance are not covered by warranty.
