

**KYALAMI**  
SLIMMING & WELLNESS

## REDUCE BODY FATS IN A SPECIFIC AREA

Our unique developed lipofreeze injection contains unique ingredients to assist with burning fat in the body while destroying and breaking down fat cell walls in the body.

## COMPOSITION

- **L carnitine** – burns fat, assists with reducing visceral belly fat, increases energy by turning body fat into energy
- **Phosphatidylcholine** – dissolves fat in the body and destroys the cell walls of the fat cells, it melts subcutaneous fat in the area of injection
- **Paulina cupana** – boosts the metabolism to work faster and burn fat faster
- **Proprietary blend** – an ingredient that is used minimal in the solution, but aids in the process of the effects of the product

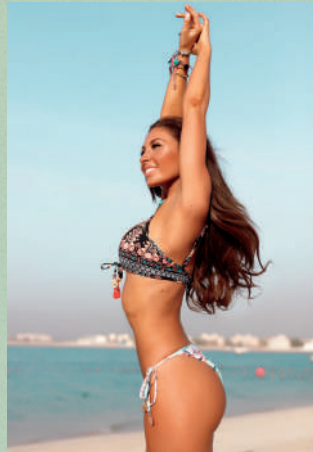

## WHO CAN BENEFIT FROM THIS?

- Overweight individuals
- Individuals with lots of belly fat
- Individuals battling to get rid of fat even if they exercise and eat healthy
