

BEFORE & AFTER CARE

The client needs to know the full process of their upcoming procedure when it comes to before and after care. This ensures that our clients are fully informed before their procedure, in case they were planning a vacation or had a procedure done prior to this one. It is important for you that the client knows all necessary information and this will ease any anxiety that they may have about their upcoming procedure.

Please Note: the eyebrows will appear darker and bolder due to the scabbing and healing for the first 10 days. This is very common for all permanent cosmetic procedures. It is normal during the healing process for the pigment to lighten up.

Ombre Before Care

- Do not have a tan or sunburned face
- Do not take medications such as Aspirin, Niacin, Vitamin E or Ibuprofen 24 hrs before procedure
- No alcohol or caffeine on the day of the procedure
- Please note that you will be more sensitive during your menstrual cycle
- No blood thinners 3 days prior to procedure

Eyebrow After Care

- Clean the brow with water and apply aftercare lotion
- For dry to normal skin, apply 2-3 times a day for 3 days
- For oil skin, apply once a day for 3 days
- DO NOT pick or scratch at the treated area
- Avoid direct sun exposure or tanning for 3-4 weeks after procedure
- Avoid heavy sweating for the first 7 days after the procedure
- No facials, Botox, chemical treatments and microdermabrasion for 4 weeks
