Magic Drops:

- Ketorolac: Anti-Inflammatory
- Moxifloxacin: Antibiotic
- Prednisolone: Steroid

A pharmacy staff member will contact you once the prescription is received to go over the medication and collect payment/shipping information. If you have not heard from RC Compounding **at least 10 days** prior to your procedure, **please call the pharmacy at 330-707-9001.**

A Few Reminders:

- Settling will occur and is normal, shake well before each use.
- Your bottle will not look completely full because your doctor only ordered 10ml, also this gives you room to shake the medication.
- The eye drops are stable and stored at room temperature.
- Be careful not to get any of this medication on your skin or clothing because it may stain.
- Side effects are uncommon, but may include:
 - Stinging/burning/itching/irritation of the eyes for 1 to 2 minutes when you apply this medication, temporary cloudy vision, increased sensitivity to light, visual disturbance (blurry vision), and feeling like something is in your eye.
- Signs of an allergic reaction to one of the ingredients may include:
 - Rash, swelling of the eye, or difficulty breathing.
 - If you experience any of these symptoms call your doctor or seek medical attention.
- You may report side effects to FDA at 1-800-FDA-1088.
