Math was good  
Math was gold  
Use my fingers to count? I'm sold  
But then things, got intense.  
How can abstract math make sense?

Mmm, I didn't know how to solve ya  
I'm not gonna lie  
Started to cry, but then remembered pi...

***Pi is an exact number  
Writes angles in radians  
Trig no longer takes hours  
'Cause I can do it by hand  
Pi is really not fancy  
A ratio, you understand  
Yeah, pi is just C over D, the quotient***

Pi is just a number  
Pi is just a number, baby...

Pi is ir-rational  
It begins 3 point one four  
No repeats, so I'm told  
Used for circles, trig, and more

Ooh, how can I calculate ya?  
Rounding isn't right  
Started to cry, but then remembered pi...
