

QUICK CATCH LS™

33% Slider LS™ Perennial Ryegrass

33% Torsion LS™ Perennial Ryegrass

34% Grand Slam GLD Perennial Ryegrass

Tough & tolerant for high traffic or erosion areas.

Mixture for overseeding or patching spots

LATERAL SPREAD LAWN SEED MIXTURES

Lateral Spread lawn mixtures have a spreading tiller which fills in bare spots fast for increasing density to prevent possible weed pressures. These mixtures are fine leaved and dark green in colour. Each mix is custom designed making our seed company the only ones with this technology in Eastern Canada.

APPLICATION:

- Apply at a rate of 5-7 lbs/1000 sq ft
- Optimal overseeding application time is early spring or fall
- Good germination depends on adequate moisture and good seed to soil contact.
