

Essential Post-Seeding Steps!

Seeding your lawn is just the beginning! Here's what you need to do for a thriving green haven:

1 Water wisely: just enough to keep it damp

- Rain Days : NO watering
- After Rain Days : check it*
- Sunny Days : check it*

*dark top dressing = damp/wet : NO watering

*light top dressing = dry : WATER (once in am & pm, more as needed)

2 No foot traffic!!

3 No mowing!

The quote you originally received for mowing is for recurring services once the lawn is strong and healthy. We may have to re-assess this for maintenance while the new grass takes hold as special equipment/time may be necessary.

From time to time we will offer weekly advice to guide your lawn's growth. Meanwhile if you have questions, please let us know! aj@roperpm.ca
