

## Paperless Cloud Calibration Management

**PCX brings all the critical details of calibration management to an easy-to-use web-based application.**

Designed with the end-user in mind, PCX is built on Prime Technologies' decades of experience helping companies across the world manage their calibration workflows.

### PCX Features

- Out-of-the-box compatibility with Fluke documenting process calibrators.
- A modern, intuitive interface.
- A native desktop application.
- Preconfigured field calibrator templates covering hundreds of the most common calibration modes.
- Enhanced workflows for ad-hoc calibrations.
- Year-over-year calibration trend reports.
- Prebuilt dashboards & reports.
- Secure storage of Asset & Result data with file attachments.
- An easy Import template to create Assets from a spreadsheet.
