

Easy & Compliant Calibration Management

ProCal Direct is a complete paperless, calibration, maintenance and asset management system designed to ensure regulatory compliance and reduce operational costs for food and beverage manufacturing and processing facilities.

ProCal Direct is developed under strict quality practices that are routinely audited and approved by major life science companies. ProCal Direct is a GAMP COTS 5 (Highly Configurable) application. Each version is pre-validated prior to release. *On-Site validation scripts also available.*

ProCal Direct supports compliant record and system management as per FDA 21 CFR Part 11, ISO 9000-2001, QS 9000, ISO 13485, ISO 17025, ANSI 254, EU GMP Annex 11 and others.

Whether Single Site or Multiple Sites, get automated reminders, notifications & alerts, anytime & anywhere.

Offline work mode available for remote operations & sensitive environments.

Detailed Calibration Test Point Management for all types Assets. Schedules can be based upon calendar or usage count.

- Dimensional
- Mechanical
- Electrical
- Radiation and more...

ProCal Direct does all math functions to improve productivity and data accuracy. Calculations can accommodate varying signal associations, % reading, tables, accuracy statements, % range, resolutions and combinations, and more...

Over 60+ other test routines

Bolt on modules that provide to include algorithms, advanced math functions and reports for Uncertainty Budget, Scales & Balances, Temperature, Pressure, Radiation, Flow and more...

Workflow Management via Approval Policies

- Log every stage of a calibration job with electronic signatures for full task accountability.

ISO & FDA Compliance - 21 CFR Part 11 - Time stamps, Electronic signatures, User roles and permissions, Change Control, Audit Trail, Non-Compliance Reporting, Traceability and more...

Automate Data Capture via Documenting Process Calibrators

- Download Jobs / Tasks
- Upload Results

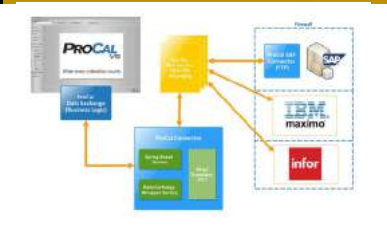

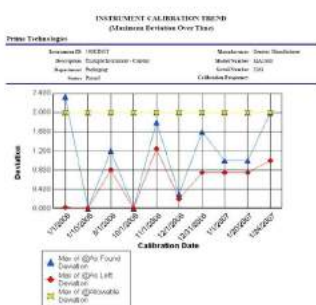

Maintenance Management:

- Work Order Module
- Planned Maintenance Module
- On-Demand Maintenance Module
- Parts & Inventory Module

Manage SOPs, Manuals, Work Instructions, Certificates & Reports via Document Manager.

Over 70+ Reports available including A3 Instrument Interval Analytics, Calibration Certificates & Labels, Reverse Traceability & more...

Use Standalone or Integrate with other systems:

SAP, Oracle, Maximo, Infor, D365, QuickBooks, GE, Rockwell, Emerson, Schneider Electric, QMS and more...
