PROCAL

The global standard for calibration management

Thousands of users across a range of industries:

- LIFE SCIENCES
- FOOD & BEVERAGE
- CHEMICAL
- PULP & PAPER
- POWER
- PETROCHEMICAL
- AND MANY OTHERS

Trusted by the largest manufacturers in the world.

Robust yet intuitive, ProCal offers a full suite of features to save time, increase productivity, and simplify the complexities related to calibrations.

The Power of Paperless Calibration

The old way of recording calibration data using pen and paper is time-consuming, labor-intensive, with the results prone to human error. ProCal, a paperless calibration solution, solves these problems (and more):

- **Performs all math.**
  No need for calculators — ever! And no human errors.

- **All information readily accessible.**
  Provides users immediate access to flexible reporting.

- **Single or enterprise use.**
  Allows for multiple accounts, each with its own unique configurations.

- **Intuitive user interface.**
  Less time hunting for functionality and more time performing calibrations, ranging from the most complex situations to the simple pass/fail.

- **ISO/GMP/FDA compliant workflow.**
  Industry-first 21 CFR Part 11 compliant calibration program that is pre-validated and ready for use.

- **Instant data retrieval.**
  Ad-hoc viewing or automated email report delivery.

- **Precision test routines.**
  Pre-engineered modules for specific types of devices.

- **Integrates with other applications.**
  ERP/EAM, CMMS, LIMS, and others.

- **Multi-language support.**
  Select from drop-down or set account defaults.

Best program for use with Fluke documenting calibrators.

PROCAL DIRECT

When every calibration counts.

PRIME TECHNOLOGIES

A TMA SYSTEMS COMPANY

A full support team stands behind you. Always.

We offer a full array of services to make your transition to ProCal as seamless as possible. Our Customer Success Team knows the software—inside and out, and sideways—and has helped thousands of ProCal users obtain the greatest value from the product.

✓ **On-Site or Virtual Application Training**

Our team provides the training your team needs, when and how they need it. We are available to come on-site, or we can conduct training virtually. It's whatever works best for you.

✓ **Data Migration & Mapping**

One of the most important first steps after you make the switch is to ensure all your existing data is pulled into the ProCal system cleanly and in a way so that you can hit the ground running. We make that happen.

✓ **User Support**

Our experts are always on hand to help with questions related to reporting, systems integrations, and more. We've got you covered.

What users say about ProCal

"ProcalV5 gives our organization a great solution to manage and run calibration in our facility. I am very pleased with the software and what it can offer. The customization of the software is a big thing! We can set-up for our needs."

- Automation & Calibration Specialist in the Food & Beverage Industry

"Once configured, the system is very easy to use and is 21CFR Part 11 compliant. The system is reliable, and you can trust that the data that goes in is protected and easy to retrieve. Working with Prime Tech to validate our system configuration has been extremely informative and our assigned project manager has been amazing to work with. We have been very satisfied with Prime Technologies and the ProCalV5 Software."

- Quality Assurance Supervisor in the Biotechnology Industry

"We will definitely be able to deliver quicker service to our customers now that we can input data instantly. We will also be saving on a lot of paper as we used to print out forms to fill out for each instrument. It's nice to say we are doing our part for the environment."

- Administrator in the Industrial Automation Industry

PRIME TECHNOLOGIES
A TMA SYSTEMS COMPANY

WHO IS PRIME TECHNOLOGIES?

For over three decades, we have been a global leader in the development of asset management software.

Our high-level domain expertise enables us to provide clients with a well-structured, data-centric software platform that will improve and formalize their calibration and maintenance management practices.

FLUKE.

With representation by a network of international agents and our long-standing strategic alliance with Fluke Corporation, our systems are widely used by thousands of companies, large and small, around the globe.

These systems are often integrated with enterprise-level ERP/CMMS systems to harmonize practices, ensure compliance, reduce operational expenses, and service multiple site locations.
