## Recover Well with Innovative DME: Cold Therapy at its Best

- ✔ The Innovative DME Cold Therapy Cooler is a cutting-edge Cold Therapy System designed to provide automatic, continuous, and intermittent cold therapy precisely to targeted body areas using compression wraps.
- ✔ These specialized wraps offer soothing relief, effectively combating inflammation, and reducing pain, resulting in a faster post-surgery recovery experience.
- ✔ Versatility meets ease with our device, which seamlessly adapts to shoulder, back, hip, knee, or ankle wraps. Its user-friendly design ensures effortless attachment and release.
- ✔ Stay informed with the LED display indicating battery status, while the integrated timer records therapy duration for your convenience.
- ✔ Featuring water-repellent isolation pads, quick cooling thermal insulation, and anatomically tailored wrap designs, this product delivers unmatched comfort.

### Technical Specifications:

- Display: LED
- Cycle Time: 15, 30, 45, or 60 minutes, or OC (non-stop)
- Operation Mode: Over 10 hours
- Power: AC Adapter, Rechargeable Battery
- Weight: 4.8 lbs.
- Device includes 1 universal wrap.
- Dimensions: 11" x 7.8" x 8.4"
- Voltage: DC12V 1A
- Required Power: AC100V~AC240V
- Default Pressure: 225 mmHg ± 25 mmHg
- Work Environment: temperature 5~40°C; Relative humidity (RH), not over 85%.
