

## Al-Qatraneh

The Al-Qatraneh disclosure session was held at the Al-Qatraneh North Municipality Hall for Women, with 19 participants, including community members and representatives from governmental entities, engaging in discussions on local community matters and providing their feedback. The following provides a summary of the discussion key points.

**Table 1: Record of Qatraneh Disclosure Session - January 2026**

Qatraneh		
<b>Location:</b> Al-Qatraneh North Municipality Hall for Women <b>No. of Participants:</b> 19 <b>Participants:</b> <ul style="list-style-type: none"> <li>▪ Community members</li> <li>▪ Governmental Entities</li> </ul>		
Topic	Question	Answer
<b>Environmental, Social, Health, Safety, and Security</b>	The CLO should be assigned to coordinate with the district governorate offices.	----
<b>Water Share</b>	The issue of water scarcity was raised, noting that water is passing through the streets and some areas are not receiving their share.	There will be distribution points along the pipeline, and each governorate will receive its allocated portion of water.
	Will there be a spot where hairdressers can get water for free?	The project team does not have the authority to provide further details beyond what has been planned.
<b>Employment Opportunities and Local Procurement</b>	When will job opportunities be available?	Yes, there will be employment opportunities for each governorate during the construction phase.
	Administrative job opportunities instead of low-skilled jobs are required, and a database in coordination with the local authorities to prioritize hiring must be developed. The database will be delivered to the Qatraneh Labor Office and will include all names of local residents.	The project company requested that the contractor provide a complete list of the requested job opportunities so that community members can prepare themselves.
	Community members should receive training for the job opportunities according to set criteria to ensure fairness and a transparent selection process.	----
<b>Technical Matters</b>	Will the pipeline in Al-Sultani and Al-Abyad run along the main road?	The pipeline will follow the Disi route and avoids densely populated areas and commercial zones.
<b>Land Acquisition and Compensation</b>	Are there private lands to be acquired, and how will the acquisition process be handled? Will there be fair compensation?	A detailed study will be conducted to identify all privately owned lands, and fair compensation will be provided to those impacted.
	Should users of tribal or customary lands be compensated if their land is affected?	As long as the land is being utilized, the owner or user will receive compensation.
<b>Community Support</b>	The community can be supported by distributing green fodder to farmers and herders as a community service.	----
	Since the pipeline will be shifted to avoid passing through the local community, the	----

	savings from this shift should be invested in the districts.
