

Fisherbrand™ Lab Furnishings

Laboratory Case Study

Meridian R&D Lab

Our Brentwood, MO site suffered a sudden & catastrophic flood which resulted in a total loss of lab function. All lab furnishings and most equipment were rendered useless. Brad Campbell, from Fisher Scientific, was contacted and immediately joined forces with the MMT team to identify the extent of the damage and the specific lab design and equipment programming needed to bring the lab spaces back into operation. Fisher Scientific and the Fisherbrand furniture team were able to get us back up and running within 14 days which greatly minimized the impact to MMT. After the first lab was completed the Fisher team was able to move through the building to sequentially build the balance of the labs all while ensuring each of them was outfitted with equipment and consumables to serve them.

Flood
Damage

Brad and his team were able to complete a near impossible mission by listening, coordinating and executing in collaboration with our MMT recovery team. We truly could not have done this without the professional assistance, the depth of product offering and level of care that is unique to this sales rep and Fisher Scientific.

Repairs made within 14 days!
