

MAX Systems Review

Expert assessment on the use of your MAX ERP System

Utilizes the Handy Data Audit Tool

“Quickly assess the completeness of your ERP system implementation and uncover opportunities for improving the return on your MAX investment.”

The MAX Systems Review combines the power of the Handy Data Audit (HDA) application with the knowledge and experience of a professional services consultant to provide a grounded, in depth conversation on your systems usage.

Results:

- A written report delivered that describes modules, critical fields, and field enumerations.
- Grounded assessments on how your MAX ERP system is being utilized, or not.
- From a professional consultant that understands how the data impacts your business. Report of critical missing data. Answers: “How much of your system are you really using?”
- Detailed discussion on whether a business process or software feature is required, or not, presents opportunity for learning and improving.
- Identification for future areas to implement.
