

DANCE FLOOR SIZE GUIDE

How to know which size to get according to the amount of guests you'll be having

First, you will take the approximate amount of guests you'll think will be dancing at any given time.

For this example, let's say you have 54 guests. Now that you know you'll be having around 54 guests dancing at the same time, you can multiply by the recommended square footage of 5 square footage per dancer.

54 people x 5 sqft = 270 square feet needed

This means you will need a 15ft x 18ft dance floor with a total of 30 floor tiles.

	3'	6'	9'	12'	15'	18'	21'	24'	27'	30'
3'	9	18	27	36	45	54	63	72	81	90
6'	18	36	54	72	90	108	126	144	162	180
9'	27	54	81	108	135	162	189	216	243	270
12'	36	72	108	144	180	216	252	288	324	360
15'	45	90	135	180	225	270	315	360	405	
18'	54	108	162	216	270	324	378			
21'	63	126	189	252	315	378				
24'	72	144	216	288	360					
27'	81	162	243	324	405					
30'	90	180	270	360						

THE NUMBER ON THE OUTSIDE = HOW BIG THE DANCE FLOOR WILL BE IN FEET

THE NUMBER ON THE INSIDE = SQUARE FOOTAGE OF THE DANCE FLOOR
