

DANCE FLOOR SIZE GUIDE

How to know which size to get according to the amount of guests you'll be having

First, you will take the approximate amount of guests you'll think will be dancing at any given time.

For this example, let's say you have 50 guests. Now that you know you'll be having around 50 guests dancing at the same time, you can multiply by the recommended square footage of 5 square footage per dancer.

$$50 \text{ people} \times 5 \text{ sqft} = 250 \text{ square feet needed}$$

This means you will need a 16ft x 16ft dance floor with a total of 16 floor tiles.

	4'	8'	12'	16'	20'	24'	28'	32'	36'	40'
