

	2026 List
	Specific Cotton Chemicals (PGR and Defoliant)
	1.Mepiquat Pentaborate (Generic Pentia a PGR)
	2.Cyclanilide and Ethepon (Generic Finish 6 Pro a Defoliant)
	Herbicides Used in Various Crops
	1.Trifluralin (Generic Treflan)
	2.Flumi (Generic Valor)
	3.S-Metolachlor (Generic Dual II Magnum)
	4.Glyphosate (a Generic Powermax formulation)
	5.Atrazine
	Surfactants and Water Buffering
	1.ReadyWater (replaces AMS with a few fluid ounces)
	2.Premium Non-Ionic Surfactant
	3.Enhanced Methylated Seed Oil

	2027 List (all new are pending EPA Approval)
	Specific Cotton Chemicals (PGR and Defoliant)
	1.Mepiquat Pentaborate (Generic Pentia a PGR)
	2.Cyclanilide and Ethepon (Generic Finish 6 Pro a Defoliant)
	Herbicides Used in Various Crops
	1.Trifluralin (Generic Treflan)
	2.Flumi (Generic Valor)
	3.S-Metolachlor (Generic Dual II Magnum)
	4.Glyphosate (a Generic Powermax)
	5.Atrazine
NEW	6.Pyroxasulfone (Generic Zidua)
Footnote	7.L-Glufosinate (Competitor to Liberty Ultra)
NEW	8.dimethenamid-P (Generic Outlook)
NEW	9.Tembotrione (Generic Laudis)
NEW	10. Diuron
	Surfactants and Water Buffering
	1.ReadyWater (replaces AMS pounds vs fluid ounces)
	2.Premium Non-Ionic Surfactant (similar to CHS Last Chance)
	3.Enhanced Methylated Seed Oil (similar to CHS Tapran)
Footnote	L-Glufosinate is a Big One. We might have to sell the technology for capital. But if Vulpes does produce we expect to sell this for around \$42/gal versus Liberty Ultra at \$60 per gal.. That is a 30% savings. The question is can we raise the funds to build the plant in 2026 for 2027 production.

	2028 List
	Plan to know what members need and register accordingly.
	GFA will have the 2027 products and hopes to launch 3 more.
	The only limitation is members.
