

ASTHRAVEDA TECHNOLOGIES

"Right knowledge is
the ultimate solution to
all problems"

ABOUT US

Asthaveda Technologies are set to make a difference in defence, instrumentation & control system, and AR & VR technology as a holistic solutions provider. Asthaveda is all about delivering measurable business results through a unique value proposition by implementing end-to-end solutions. We also undertake operations and maintenance (O&M), Testing and commissioning in the electrical sector.

WHY CHOOSE US?

Uniquely talented and passionate people working towards an AatmaNirbhar Bharat with a commitment to the highest quality, professionalism, and ethical standards to provide cutting-edge technology and products under the Make in India program.

Our Mission

Our mission is to identify, innovate and develop technologies that strengthen India whilst assisting the best minds and collaborators to achieve their full potential.

Our Vision

Contribute to our society through technology and talent by creating superior solutions and services that create a better tomorrow.

Our Values

Strong commitment, competence and high ethical standards at every level of our company

SERVICE OVERVIEW

Sensors manufacturing

We manufacture hydrostatic level sensors that provide continuous measurement of liquids in tanks and vessels by measuring the pressure. These level sensors are used for level measurement of water, oil and chemicals in industrial applications and processes.

We are currently working for the Navy and Indian shipyards

Electrical testing and commissioning

Asthaveda Technologies is specialized in testing & commissioning services for power system equipment, and complete sub-station including GIS & Switchyards up to 400 kV in India.

Testing and commissioning are carried out with the purpose of installations. This ensures that the process till now is safe and exactly meets the design requirements.

Operation & Maintenance

Operation & Maintenance of electrical systems such as switchyard, switchgear, Power plants, Defense facilities, Process plants like cement plant, chemical plant, steel plant, Coal handling plant, etc. We provide quality services in operation & Maintenance for deputing our engineers & Instruments for 7x24hours, 3 shifts to maintain uninterrupted production of the plant. And also provides engineers in case of emergency maintenance and troubleshooting activities required during production. Our company provides Periodical maintenance schedule preparation and execution.
