

By way of introduction ...

I am an Architect with over four decades of experience focused on EXCEPTIONAL GUEST EXPERIENCES. My career has been dedicated almost exclusively to being a representative who develops and delivers projects under budget and on time.

Employed around the globe in the leisure / entertainment / theme park / resort industry, I also spent eight years overseeing the revitalization of a downtown area. I have honed my skills at the executive level of management, delivering strategic and master planning, designs, construction, project management and ongoing maintenance/engineering support in a creative manner.

A firm believer in collaboration, I am deeply experienced in leadership, including positions with responsibility for P&L / balance sheet content delivery and management. Through the years, I have supervised and worked hand-in-hand with architects, engineers, art / creative directors, project managers, construction managers, maintenance teams and various support administrative positions.

I possess an intimate knowledge of the inner workings of theme park, resort, and community planning operations. A creative and rich “guest experience” is the product of my training, experience and way of thinking.

My guiding principles are to be fair, firm and always honest – taking ownership and pride in my decisions and outcomes.

I am now excited to introduce you to AQUACASA STUDIOS LLC where I will be providing consultancy services and continuing my passion for the built and natural environment.

If you would like to discuss further – please call me when it is a convenient time.

With warm regards,

Rick..

Richard Waterhouse – Principal Consultant
