

# Electric Vehicle Charging - OZEV GRANT FUNDED INSTALLATION

---

We are proud to be a member of the OZEV Grant Scheme, for both our residential and commercial clients.

## ***What is 'OZEV'?***

This is a Government grant that, if eligible, allows the consumer to be funded for up to 75% of the cost of installing your new EV charging station.

## ***How do I know if I'm eligible?***

There is certain criteria that will need to be met to ensure your eligibility for the grant. Some of the requirements are listed below. Don't worry if this doesn't apply to you, we will still be able to assist you in getting your new electric vehicle out on the road!

- \* Live in a flat with off street parking.
- \* Live in rented accommodation.
- \* Be a Landlord or Property Manager.
- \* Available to all businesses and charities.

## ***How do I claim the grant?***

We claim it for you so there is no need to worry! Our aim is to ensure your EV charger is installed with minimal hassle. Our first point of call will be an initial survey of the property, to ensure safety and compliance. We can make arrangements directly with your electricity supplier if necessary, and all work is

notified upon completion!

***Check out some of the types of EV Charging Stations we supply and install below!***

*Wallbox*

*Rolec*

*Zappi*

*Easee*

***Contact us:***

Speak to one of our representatives about how we can help with your installation.
