Construction Precautions

- It is recommended to use tile adhesive for installation. Do not apply cement directly on the tile surface, especially for the ice-cracked series products.
- There is no need to soak the tiles before installation. They can be applied directly to the wall or floor.
- It is recommended to leave a 3-5mm gap for tile installation, and the color of the joint compound can be selected based on the overall design.
- When filling the gaps, the depth must be 1-2mm below the tile surface. After filling the grout, use a soft product (such as a rubber tube) with a size matching the gap to remove excess grout, ensuring that the groove forms a U-shape that is 2mm below the tile surface.
- After filling the gaps, promptly clean any residual grout left on the tile surface.

Maintenance & Servicing

- **Cleaning method:** Use gentle cleaning agents and soft cloths to regularly clean the tile surface. Avoid using strong acids, strong alkalis, or corrosive cleaning agents to prevent damage to the tile surface.
- **Watermark treatment:** Promptly remove watermarks on the tile surface to prevent prolonged retention that could lead to water infiltrating into the tile body and affecting its aesthetics.
- **Placement of heavy objects:** Avoid placing excessively heavy objects, especially those with sharp edges, on the handmade tiles to prevent scratches or crushing of the tile surface.
- **Waterproof measures:** For areas that frequently come into contact with water, such as kitchens and bathrooms, waterproof measures should be taken to prevent water from infiltrating into the tile body.
- **Regular maintenance:** For handmade tiles that have been in use for a long time, regular waxing, polishing, and other routine maintenance methods can be performed to maintain their gloss and brightness.

Notice

QIANZI IMPRESSION reserves the right to make changes to the materials, finishes and designs of the products presented in this catalogue, without notice.

Tones and textures are shown for indicative purposes only. All our products are handmade, and are therefore subject to variations that attest to their

uniqueness. Colours of finishes are subject to the tolerances of the printing process.
