

NEW SPECIALTY PROSTHETIC CLINIC

Experience Personalized Prosthetic Care

With more than 30 years in the industry, Henry is eager to bring innovative technology and designs for Prosthetic and Dynamic Brace patients. APS is Spokane's first open concept prosthetic clinic. With cutting edge engineering and technology, realistic simulation in the open clinic, patient involvement at every level, and extended appointment availability, every patient will find their perfect fit. Excellence in care and collaboration are core values and camaraderie is recognized and encouraged by sharing experiences to support others with limb loss.

WHAT YOU WILL EXPERIENCE AT APS:

- Specialization in the engineering and fitting of high-performance prostheses that support all active lifestyles.
- Cutting edge technology and design.
- Patient involvement throughout the entire process of design, fabrication, and fitting of the prosthesis.
- Large open concept clinic that includes a prosthetic fitting and training area.
- Realistic gait training for all levels of ambulation. Featuring uneven terrain, stairs with a ramp that include incline and decline surfaces.
- Offering Extended Appointment Times.
