

STEM Aviation Experience

AV8 Flight Training Pty Ltd – Parafield Airport
With assistance from Airborne Research Australia Ltd

Student Aviation Experience

AV8 Flight Training is pleased to offer an aviation-based STEM program to secondary school students.

The one-day program[†] consists of

- Group Aeronautical theory session (classroom)
- Group preflight inspection of an aircraft
- Tour of Airborne Research Australia aircraft and instrumentation including short presentation of the use of aircraft in scientific data collection and research.
- Inspection of maintenance facilities and composite materials used in modern aircraft manufacture
- One air experience flight for each student in a modern motorglider where the student will fly the aircraft under instruction.

Students will take away a logbook with flight time entered, a training book recording their flight training sequences, a theory book that can be referenced. Contact details for further gliding/flight training opportunities.

Program is limited to 6 students per day but can run daily for as long as required.

Our qualified instructors operate under the regulations of CASA and The Gliding Federation of Australia, and have experience working with Scouts, Air Force Cadets and University students.

[†]Flight subject to weather and operational conditions. Missed components will be rescheduled

Warren Reservoir

The Diamond HK36TTC Motorglider
