## **Quartz Care & Maintenance**

### **Daily Cleaning:**

- Use a mild dish soap with warm water and a soft sponge or cloth.
- Dawn dish soap, diluted with water is always the first choice of BSA.
- The soap to water dilution ratio we recommend is made simple by adding 1 cap full of Dawn dish soap to a 20oz spray bottle, slowly add hot water and swirl to fully mix.
- If excess streaking is visible, use slightly less soap in your next mixture, or dilute further.
- Antibacterial Dawn dish soap may also be mixed and used for food preparation areas.
- Avoid bleach or strong chemical cleaners.

### **Stain Resistance:**

- Quartz is non-porous and highly stain-resistant but not stain-proof.
- Clean spills promptly, especially from wine, coffee, and oils.

### **Heat Tolerance:**

- Quartz can tolerate moderate heat, but high heat can damage the resin binder.
- Always use trivets or hot pads for pans and crockpots.

### **Scratch Resistance:**

- Quartz is durable and scratch-resistant but not scratch-proof.
- Avoid cutting or chopping directly on the surface—use a cutting board.

### **Chemical Sensitivity:**

- Avoid harsh cleaners including bleach, oven cleaner, and paint stripper.
- Prolonged contact with chemicals can damage the surface.

### **UV Sensitivity:**

- Quartz is not recommended for outdoor use due to UV exposure causing discoloration.

**Sealing:**

- Quartz does not require sealing due to its non-porous nature.

**Maintenance Tips:**

- Keep the surface clean and dry.
- Use a non-abrasive cleanser for tougher stains (e.g., Bar Keepers Friend soft cleanser or magic eraser).
