ABOUT US

Established in 2018

We provide end-to-end services across domains such as architectural and interior design. Our services range from concept design to full exclusive projects. Our extensive experience broadly ranges from private houses, residential apartment building, to institutional and hospitality projects.

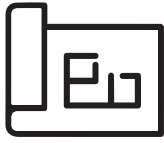

Our design approach is rooted in coalescing architecture and nature, while optimising space requirements, material design, lighting & landscape to reinvent and transform the ambience. We strive a design irrespective of the scale, we believe in approaching each project uniquely while appreciating the sublime ability of architecture

to influence lifestyle and society. Hence, we always strive to create a design which inspires people. Our forte is detailing and custom designs. Novelty in designs, client satisfaction, and sustainability are some of the prime factors which drive us. We believe in constantly exploring and evolving to serve the needs to our clients in this ever-changing world.

The Principal Architects of the firm are registered architects with the Council of Architecture and completed their Masters from international universities. They envision elegant design elements for their clients by condensing the content and form of a design to its bare essentials, revealing the true essence of architecture.

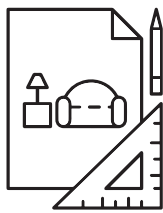

Since inception, we have undertaken over 30 projects across India and abroad in collaboration with our international partner firms in different countries like Mexico, Ecuador, Egypt and other parts of the world. We are dedicated to unique design approach adapted to each project, while achieving a balance between functionality, aesthetics, context and climate.

OUR SERVICES

ARCHITECTURAL DESIGN

All service related to architecture design from layout plans and elevations to constructive detail drawings

PROJECT MANAGEMENT

We turnkey projects in which we provide our clients with complete projects right from start to finish.

OUR PROJECTS

RESIDENTIAL & HOUSING

CASA ACENTUADA

A game of volumes, layers, scale and proportions is **CASA ACENTUADA**; An ambitious project located on East Punjabi Bagh which allowed us to explore different alternatives of design. Its composition breaks the monotony of its context, which is characterized by regular volumes and rationalist lines. This project shows how structure and design can be carried out in harmony; form and function are the main guidelines for this design. While the exterior facade is so captivating and loud, the interior remains discrete and minimalist. The combination of colors, and materials creates a subtle environment which invites to the user to experience the magnitude of this residence

RESIDENTIAL & HOUSING

A majestic green wall stands in front of the living area. Its double height highlight its presence while nature approaches to this space, breaking the definition of a typical garden

HOUSING COMPLEX

We have successfully accomplished a wide range of projects from plotted housing, private villas to big scale housing concept proposals. We don't believe in repeating design for which we strive to create something unique for all our clients according to their needs and aspirations.

NEST HOTEL

As we know the power of computational design we strive to incorporate our skills to make even small scale buildings iconic. With simple yet smart ideas we have successfully accomplished some captivating boutique hotels.

All the planks from top to bottom following different exterior profiles creates a sine wave when observed from human eye view. The longer side of planks have meticulously been oriented in horizontal direction to camouflage the front side rooms while maintaining their privacy and make the structure look wide.

3. Exterior view during construction phase, showing panel distribution in main facade

1. Exterior view of terrace in last floor during construction

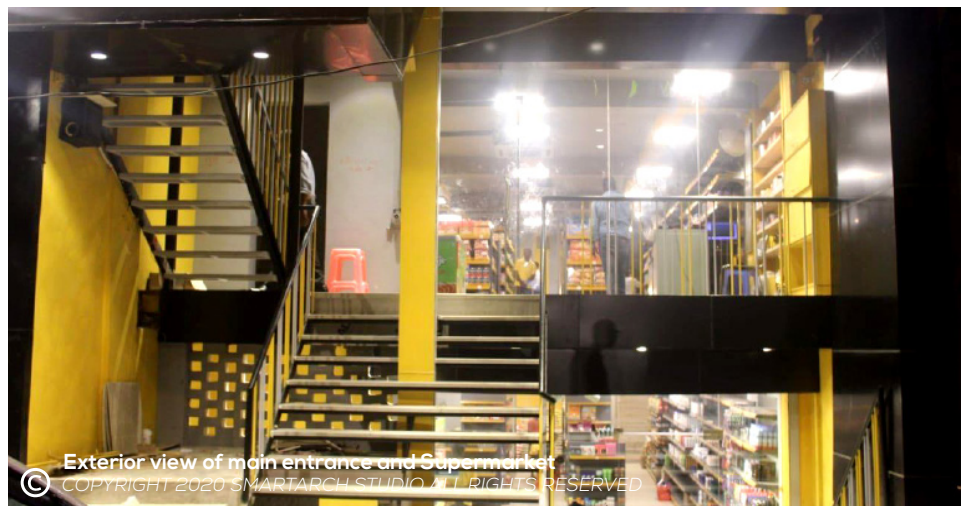

2. Exterior picture showing panels installation

4. Render of interior design for suites

COMERCIAL & HOSPITALITY

BORRERO RESIDENCY

This project is based in the historic center of Cuenca-Ecuador, work done in collaboration with ARQ+ Architectural Studio. This site is a part of a heritage building with great value, which was restored as an emergent intervention due to its pathologies and damages. In this building, interventions were carried out under parameters of traditional constructive systems, seeking to significantly increase its physical properties and external behaviour.

INTERNATIONAL PROJECTS

UPS LANDSCAPING PROJECT

As an international firm, we have developed a proposal for a prestigious university located in Ecuador (UPS), in collaboration with ARQ+ Architectural studio, in which we projected a multifunctional space for students focused in their needs and university aesthetics

UPS LANDSCAPING PROJECT

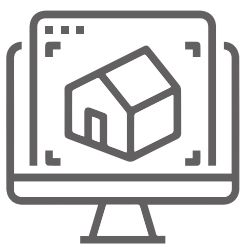

In this second approach, we have used the same guidelines as the first proposal. The clearance of the space provides legibility to the project taking into consideration accessibility norms according to urban determinations for institutional spaces. The

meticulous selection of vegetation is one of the key highlights of this project, for which we have taken into account solar radiation, wind direction, (based on a detailed study of spaces with difusse shade, their contribution along with their functionality)
