IMPACTFUL GOVERNANCE Community Interest Company

01 WHAT IS CLIMATE CHANGE & GLOBAL WARMING?
Understand the environment, the benefits and some of the challenges. What are my environmental values and where can I make a difference or be in an environmental role that helps?

02 IMPACT & CHANGE
Using renewable energy sources such as sun, wind and water, as well as reducing energy consumption at home and in the office can help reduce the carbon footprint and maintain the availability of natural resources.

03 WHAT CAN I DO?
We can show you how to eco-audit your home. Check how you can re-use, reduce or recycle to save money as well as the planet. How do we grow and eat in a sustainable way to protect nature and wildlife?

04 POLLUTION
There are many types of pollutants, some have been in the news recently like our water and others we cannot see that are in the air, causing damage to our health.
