

## ENVIRONMENTAL POLICY

Skyline considers environmental protection to be an important and integral part of conducting business. One of Skyline's guiding principles states, *"We are conscience of and are careful to take the environment into consideration in all decision-making situations"*.

Skyline's environmental policy is to:

- Control, prevent, minimize, and eliminate environmental hazards to public health and safety
- Protecting the environment from adverse effects of building maintenance operations
- Comply with all legislated standards and regulations
- Assess potential and known environmental risks
- Evaluate and monitor environmental performance to applicable standards
- Work with industry, government, and workers to maintain environmental awareness
- Provide education and awareness to participating personnel, thus allowing them to understand and share in the responsibility for monitoring and protecting the environment.
- Maintain an effective reporting and communications system
- Develop a project environmental action plan commensurate with company standards and regulatory requirements
