"Hi Frank, I just wanted to drop you a note to express my gratitude to you for the great work you did on the **Illinois Institute of Technology Campus Center** aluminum flooring. It is not an overstatement to say that without your vision and dedication we would not have the beautiful aluminum flooring we have today. Less obvious to the casual observer, but no less appreciated by those of us on the design side, are the long hours of research and development put in by you to ensure the long term beauty and integrity of this flooring system. The tremendous craftsmanship that went into the installation of the aluminum flooring is a real credit to your profession."

—Gregory Grunloh, AIA, Holabird & Root
