Durat is a sustainable solid surface material that contains recycled post-industrial plastics and is **100% recyclable**.

Expanko Resilient Flooring, a Stonhard brand, has manufactured high-performance floors for commercial environments since 1945. With seven design-friendly product lines for a variety of commercial markets from education to transportation to hospitality, Expanko leverages high performance, low maintenance, and environmentally sensitive, safe floors.

Gilasi Engineered Stone is a durable surface made of aeronautics-grade, VOC-free epoxy, and 77 to 85% recycled material. The recycled glass used in Gilasi is sourced locally, from within 250 miles of our manufacturing facility.

Plyboo's innovative and award-winning wall systems add elegance and interest to residential and commercial interiors.

Stikwood products include tongue and groove wood planking ideal for the commercial and residential design markets.

Woodwöl "tile" products are either reclaimed wood or recycled hardwood, making them a unique, visually stunning, and ethical choice!

Richlite is water-resistant, sanitary, has low moisture absorption, heat, and fire-resistant, extraordinarily dense and durable, and has a natural appeal due to its paper construction.
