

Using TankTechRx with a Water Softener

Copyright © 2018 – Dale Lee Sumner

Q: I just took your Holding Tanks class on Wednesday and have a question. I am using a Portable On-The-Go water softener on my 2016 45 ft. Tiffin Bus and want to know if there is any problem using the Probiotic Tank Treatment in both holding tanks since the water will be softened.

R: Very interesting question. I haven't fielded that one before, so I called TankTechRx and asked the experts.

Apparently, the softened water will **not** have an effect on the aerobic bacteria. Most softeners use some form of salt to soften the water. The consensus was that the aerobic bacteria might actually thrive better when “in” softened water - because the probiotic actually has some salt in it, too.

Hope this helps.
