

About Dale, the RV Tech, Teacher, & Author

Dale Lee Sumner is a retired RVIA/RVDA Master Certified RV Service Technician and former Owner/President of Mobile RV Medic, Inc.

He has over fifty-eight years of experience using and living in RV's (including more than a decade of recent "full-time" RVing), conducting the business of repairing RVs, and, now, concentrating on educating the RV owners.

And...Dale loves to teach what he writes! His goal is to provide as many RVers as possible – be they initially "Considering" RVing, just "Beginning" to RV, been "Camping" for years, or are "Full-Timers" – with a solid, baseline understanding of the different (non-house-like) functional areas in their RVs.

Dale's teaching style is educational, yet casual and entertaining. He writes in a down-to-earth, non-technical fashion so every reader can easily become familiar with the subject(s).
