

**B&O Bridge, Ferry Lot / Point, and Lower Town (1859)**  
(Viewed from Upper Town)

The Water Tower is the tall, square structure just left of center.

The taller (70-ft) white "stick" to the left  
of the water tower is a flagpole.

The RR's elevated, tight turn around Maryland Heights  
is clearly seen just left of the upper center of the image.

The C&O Canal is the whitish, flat area between  
the mountain and the river.
