

# ForgePoint3D Capability Statement

## Core Competencies

ForgePoint3D delivers precision metal parts through advanced 3D printing, design support, and fabrication partnerships. Our services include:

- Metal additive manufacturing (17-4PH, 316L, tool steels, copper, Ti64, IN625)
- Prototype and low-volume production
- Reverse engineering of legacy parts
- Post-processing, finishing, and inspection
- Fabrication, welding, cutting, and forming (in partnership with YagerBomb Customs)

## Differentiators

- Veteran-owned and operated (10% disabled veteran, U.S. Army National Guard)
- SDVOSB-qualified business based in Northeast Ohio
- Full-service solution combining additive and traditional fabrication
- Fast-turnaround and small batch capabilities
- Local, responsive, and technically qualified team
