

**La priorité des opérations  
(Évaluation)**

Nom : \_\_\_\_\_

$\frac{\quad}{32}$

1- Calcule le résultat des chaînes d'opérations suivantes. Laisse toutes les traces de tes démarches

a)  $2^5 + (6 + 18 \div 3)^2 - 50 =$

$\frac{\quad}{6}$

---

---

---

---

---

---

---

---

b)  $(-4 - (-5))^2 - (45 - 7 \times 5)^3 =$

$\frac{\quad}{6}$

---

---

---

---

---

---

---

---

c)  $(-4 - 9) \times (-18 \div 3^2) + (-12) =$

$\frac{\quad}{5}$

---

---

---

---

---

---

---

---

d)  $-5 \times 2 - 48 \div 8 + 5^0 =$

$\frac{\quad}{5}$

---

---

---

---

---

---

---

---

e)  $(108 \div 12 \div 9)^2 \times (-5)^3 =$

$\frac{\quad}{5}$

---

---

---

---

---

---

---

---

f)  $(10 - 10 \times 2)^3 \div (-2) + 100 =$

$\frac{\quad}{5}$

---

---

---

---

---

---

---

---
