

# Portable Raman Spectrometer RMP-510

JASCO's new RMP-510 has been developed to meet the needs of Material Science, Manufacturing and Biochemistry by combining the flexibility of a fiber optic probe with a portable Raman Microspectrometer.

The RMP-510 is easy to use, offers a broad spectral range, and comes standard with 2.0 cm<sup>-1</sup> resolution. An additional automated grating offers high resolution to 0.5 cm<sup>-1</sup>. Image capture and a manual stage are included for Raman Microscopic Analysis. Fiber optic cables allow the probe to be removed from the stage for analyzing larger samples.

Spectra Manager Software simplifies data collection, analysis, and daily validation. Sadtler's Know It All  $^{\text{TM}}$  software is included for library searching and sample database creation.

Installation and training are included.
