

Project 4 Vases

Project: Create vases.

1. Start with 4-5 pounds of clay.
2. Vases are large cylinders with curves and usually a trimmed foot.
3. Vases come in all shapes and sizes (see examples below) but don't make the neck too narrow or you will not be able to trim the foot.
4. Make sure to leave extra clay at the bottom to trim the foot.
5. Remove excess clay from the base of the vase before removing it from the wheel.
6. When you can handle the clay but before the clay is leather hard trim the foot.
(See illustrations below)
7. Once the clay is leather hard, smooth any marks with a rib or sponge.
